V. RISK FACTORS

1. Standard Risk Factors

a. Standard Risk Factors for investments in Mutual Fund

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the scheme invests fluctuates, the value of your investment in the scheme may go up or down.
- Mutual Fund investments are subject to market risks, read all scheme-related documents carefully.
- Mutual Funds and securities investments are subject to market risks and there can be no assurance and no guarantee that the Scheme will achieve its objective.
- As with any investment in stocks, shares and securities, the NAV of the Units under this Scheme can go up or down, depending on the factors and forces affecting capital markets, in general, such as, but not limited to, changes in interest rates, currency exchange rates, changes in Government policies, taxation, political, economic or other development and increased volatility in the stock and bond market..
- Past performance of the Schemes, the Sponsors or its Group / Affiliates / AMC / Mutual Fund is not indicative of and does not guarantee the future performance of the Scheme.
- Investment in equity and equity related securities including option contracts involve high degree of risks and investors should not invest in the schemes unless they can afford to take the risk of losing their investment.
- The sponsors are not responsible or liable for any loss resulting from the operations of the scheme beyond the initial contribution of Rs. 1 lakh made by them towards setting up of the mutual fund.
- The name of the Scheme does not in any manner indicate either the quality of the Scheme, its future prospects or the returns. Investors therefore are urged to study the terms of the Offer carefully and consult their Tax and Investment Advisor before they invest in the/any Scheme
- Growth, appreciation, IDCW and income, if any, referred to in this Scheme Information Document are subject to the tax laws and other fiscal enactments as they exist from time to time.
- The NAVs of the Scheme may be affected by changes in the general market conditions, factors and forces affecting capital market, in particular, level of interest rates, various market-related factors, trading volumes, settlement periods and transfer procedures.
- IDCW, if any are/will be subject to the availability of distributable surplus of the Scheme.
- Investment decisions made by the AMC may not always be profitable.

Additional Risks:

Cybersecurity Risk: The Scheme(s) are susceptible to operational, information security and related “cyber” risks both directly and through external stakeholders. Similar types of cybersecurity risks are also present for issuers of securities in which the Scheme invests, which could result in material adverse consequences for such issuers and may cause the Scheme’s investment in such issuers to lose value. In general, cyber incidents can result from deliberate attacks or unintentional events. Cyber incidents include, but are not limited to, gaining unauthorized access to digital systems (e.g., through “hacking” or malicious software coding) for purposes of misappropriating assets or sensitive information, corrupting data, or causing operational disruption. Cyberattacks may also be carried out in a manner that does not require gaining unauthorized access, such as causing denial-of-service attacks on websites (i.e., efforts to make network services unavailable to intended users). Geopolitical tensions may increase the scale and sophistication of deliberate attacks, particularly those from nation states or from entities with nation-state backing. Cybersecurity failures by, or breaches of, the systems of the external stakeholders (including, but not limited to, index and benchmark providers, fund accountants, custodians, RTA, etc.), have the ability to cause disruptions and impact business operations.

While there may be business continuity plans in the event of, and risk management systems to prevent, such cyber incidents, there are inherent limitations in such plans and systems, including the

possibility that certain risks have not been identified, that prevention and remediation efforts will not be successful or that cyberattacks will go undetected.

b. Additional Geopolitical Risk Factors for investors

1. Political Risk:

Political risk refers to the potential adverse effects on the returns of investments by political changes within a country's political structure, instability in its political climate or corrupt practices. Any changes in the govt regulations and policies could also affect the returns from the investments. Action or inaction of any of the Government, central or state or local, may have significant impact on the Indian economy, which could affect companies, general business and market conditions, prices and yields of securities in which the scheme(s) invest. The occurrence of external tension could also affect the political and economic stability of India and consequently have an impact on securities invested.

2. Economic Risk

A slowdown in economic growth or macroeconomic imbalances such as the increase in central and state level fiscal deficits may adversely affect investment in the country. The underlying growth in the economy is expected to have a direct impact on the volume of new investments in the country.

3. Foreign Currency Risk

The Schemes of Unifi Mutual Fund is dominated in Indian Rupees (INR) only. The INR value when converted into any foreign currency by overseas investors could be lower on account of currency movements. In the event of capital and exchange controls are imposed by the government authorities, it would prevent foreign investor's ability to convert INR into foreign currency and /or transfer outside India. The convertibility and transferability of INR proceeds into their home currency is the sole responsibility of the foreign investors.

Unifi AMC does not manage currency risk for foreign investors and it is the sole responsibility of the foreign investor to manage or reduce currency risk on their own. The Sponsor/Fund/Trustee/AMC are not liable for any loss arising to the foreign investors from such currency risks.

4. Risk of substantial redemption

The Scheme(s), at times, may receive large number of redemption requests leading to asset-liability mismatch and the fund manager would be required to effect distress sale of the securities leading to lower realization of profits, realignment of the portfolio and thus consequentially resulting investing lower yielding instructions.

Further, the liquidity of investments in the scheme may be restricted by trading volumes and settlement periods. Settlement may extended significantly by unforeseen circumstances beyond the influence of the AMC. The inability of the scheme to sell intended securities due to liquidity and settlement problems, could thus cause delay for processing the large number of redemption requests.

The Trustee, in the general interest of the Unit holders of the Schemes offered under this SID and keeping in view of the unforeseen circumstances/unusual conditions, may limit the total number of units which can be redeemed on any business day depending on the total saleable securities in the scheme.

**c. Risk factors of not maintaining average AUM of Rs. 20 crores on half yearly rolling basis
(Applicable only for open ended debt oriented schemes)**

As per clause 6.12.2.2 of SEBI Master Circular for Mutual Fund dated 27th June 2024, an average AUM of 20 crore on half yearly rolling basis shall be maintained for open ended debt oriented schemes. In case the average AUM of the open ended debt oriented schemes falls below the above stipulated amount, the AMC shall scale up the AUM of such scheme within a period of six months so as to comply with the above requirement, failing which the provisions of Regulation 39 (2) (c) of SEBI (Mutual Funds) Regulations, 1996 would become applicable.

d. Risks associated with different derivative strategies

AMC may use various derivative instruments, from time to time, in an attempt to protect or hedge the portfolio values.

- Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investors. Execution of such strategies depends upon the ability of the Fund Manager to identify such opportunities. Identification and execution of the strategies to be pursued by the Fund Manager involved uncertainty and decision of Fund Manager may not always be profitable. No assurance can be given that the Fund Manager will be able to identify or execute such strategies.
- Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative add to the portfolio and the ability to forecast price of securities being hedged and interest rate movements correctly. There is a possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the “counterparty”) to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mis-pricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- The risks associated with the use of derivatives are different from or possibly greater than the risks associated with investing directly in securities and other traditional investments.
- The schemes may invest in floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be less than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments
- The Scheme may face execution risk, whereby the rates seen on the screen may not be the rate at which the ultimate execution of the derivative transaction takes place.
- The Scheme may find it difficult or impossible to execute derivative transactions in certain circumstances. For example, when there are insufficient bids or suspension of trading due to price limit or circuit breakers, the Scheme may face a liquidity issue.
- Investments in index futures face the same risk as the investments in a portfolio of shares representing an index. The extent of loss is the same as in the underlying stocks.
- The Scheme bears a risk that it may not be able to correctly forecast future market trends or the value of assets, indices or other financial or economic factors in establishing derivative positions for the Scheme.

- There is the possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counter party") to comply with the terms of the derivatives contract. The counter party may default on a transaction before settlement and therefore, the Scheme is compelled to negotiate with another counterparty at the then prevailing (possibly unfavorable) market price.
- The risk of loss in trading futures contracts can be substantial, because of the low margin deposits required, the extremely high degree of leverage involved in futures pricing and the potential high volatility of the futures markets.
- Where derivatives are used for hedging, such use may involve a basis risk where the instrument used as a hedge does not match the movement in the instrument/underlying asset being hedged. The risk may be interrelated also e.g., interest rate movements can affect equity prices, which could influence specific issuer/industry assets.
- Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Risks specific to certain derivative strategies are highlighted below:

(i) Risk Factors of SWAP/Forward Rate Agreement (FRAs)/Interest Rate Futures (IRFs)

Credit Risk: The credit risk in derivative transaction is the risk that the counter party will default on its obligations and is generally low, as there is no exchange of principal amounts in a derivative transaction.

Market Risk: Market movements may adversely affect the pricing and settlement of derivatives.

Illiquidity Risk: This is the risk that a derivative cannot be sold or purchased quickly enough at a fair price, due to lack of liquidity in the market. (ii) Basis Risk associated with imperfect hedging using

(ii) Interest Rate Futures (IRF):

The imperfect correlation between the prices of securities in the portfolio and the IRF contract used to hedge part of the portfolio leads to basis risk. Thus, the loss on the portfolio may not exactly match the gain from the hedge position entered using the IRF.

(iii) Risk pertaining to covered call strategy: Incorrectly pricing the option premium before writing the covered call by ignoring factors which determine pricing like number of days to expiry, adjustment with respect to announced corporate actions like dividend etc.

(iv) Risk pertaining to Basic Structure of an Index Future:

RISKS associated with index future strategy:

The strategy of taking a long position in index futures increases the exposure to the market. The long position is positively correlated with the market. However, there is no assurance that the stocks in the portfolio and the index behave in the same manner and thus this strategy may not provide gains perfectly aligned to the movement in the index.

The long position will have as much loss/gain as in the Underlying Index. e.g. if the index appreciates by 10%, the index future value rises by 10%. However, this is true only for futures contracts held till maturity. In the event that a futures contract is closed out before its expiry, the quoted price of the futures contract may be different from the gain/loss due to the movement of the Underlying Index. This is called the basis risk.

While futures markets are typically more liquid than the underlying cash market, there can be no

assurance that ready liquidity would exist at all points in time, for the Scheme to purchase or close out a specific futures contract.

Risk pertaining to strategy of Downside Protection Using Stock Put:

There can be no assurance that ready liquidity would exist at all points in time, for the scheme to purchase or close out a specific options contract.

A hedging strategy using Put Options is a perfect hedge on the expiration date of the put option. On other days, there may be (temporary) imperfect correlation between the share price and the put option.

Risk pertaining to using Call option on Index to increase percentage investment in equities:

The strategy of taking a long position in index call option increases the exposure to the market. The long position is positively correlated with the market. However, there is no assurance that the stocks in the portfolio and the index behave in the same manner and thus this strategy may not provide gains perfectly aligned to the movement in the index.

The risk/ downside, if the market falls/remains flat is only limited to the option premium paid.

The long position will have as much loss/gain as in the Underlying Index. For e.g. if the index appreciates by 10%, the index options value rises by 10%. However, this is true only for options held till maturity.

While option markets are typically less liquid than the underlying cash market, hence there can be no assurance that ready liquidity would exist at all points in time, for the Scheme to purchase or close out a specific contract.

Risk pertaining to using Put option on Index to minimize downside in equities.

The strategy of taking a long position in index put option hedges a portfolio of long only stocks/funds against potential markets falls. The long position in the put option is negatively correlated with the market. However, there is no assurance that the stocks in the portfolio and the index behave in the same manner and thus this strategy may not provide gains perfectly aligned to the movement in the index.

The risk/ downside, if the index remains above the strike price is only limited to the option premium paid. The premium paid is the maximum downside to the portfolio. There is positive return in the put strategy only if the index falls below the strike price.

The long position will have as much loss/gain as the reverse of the Underlying Index. For e.g. if the index depreciates by 10%, the index options value rises by 10%. However, this is true only for options held till maturity.

While option markets are typically less liquid than the underlying cash market, there can be no assurance that ready liquidity would exist at all points in time, for the Scheme to purchase or close out a specific contract.

d. Other risk factors:

(i) Swing Pricing:

As per SEBI provision 4.10 of SEBI Master Circular on Mutual Funds dated June 27, 2024 , Swing pricing framework is applicable to open ended debt mutual fund schemes (except overnight funds, Gilt funds and Gilt with 10-year maturity funds).

Swing Pricing refers to a process for adjusting a funds net asset value (NAV) to effectively pass on the transaction costs stemming from net capital activity (i.e. flows into or out of a scheme) to the investor

associated with that activity. This will ensure fairness of treatment of all investors i.e. whether entering, exiting or remain invested in the scheme, particularly during the market dislocation.

When the Swing Framework is triggered and swing factor is made applicable, both the incoming (unit holders who submit purchase/switch-in requests) and outgoing investors (unit holders who submit redemption/switch out requests) shall get NAV adjusted downwards for swing factor. Swing pricing shall be made applicable to all unitholders at PAN level with an exemption for redemptions up to Rs. 2 lacs for each scheme.

Mandatory Swing pricing during market dislocation

The swing pricing framework will be made applicable only for scenarios related to net outflows from the scheme. Swing pricing will be mandatory during the period of market dislocation announced by SEBI. Once market dislocation is declared, it will be notified by SEBI that swing pricing will be applicable for a specified period. The provision of swing pricing for market dislocation shall be applicable in terms of provision no. 4.10.4 of SEBI Master circular on Mutual Fund dated June 27, 2024, and Classified themselves in any of the cell A-III, B-II, B-III, C-I, C-II and C-III of Potential Risk Class (PRC) Matrix in terms of provision no. 4.10.4.3 of SEBI Master circular on Mutual Fund dated June 27, 2024 or as guided by SEBI/AMFI from time to time.

Mandatory swing factor will be applied on redemption and subscription transactions in the scheme during market dislocation period announced by SEBI as per Minimum swing factors disclosed in the Scheme Information Document of the Scheme. When swing pricing framework is triggered and swing factor is made applicable, both the incoming and outgoing investors shall get NAV adjusted for swing factor.

Risk factors associated with processing of transaction through Stock Exchange Mechanism

The trading mechanism introduced by the Stock Exchange(s) is configured to accept and process transactions for mutual fund Units in both Physical and Demat Form. The allotment and/or redemption of Units through NSE and/or BSE or any other recognised Stock Exchange(s), on any Business Day will depend upon the modalities of processing viz. collection of application form, order processing/settlement, etc. upon which the Fund has no control. Moreover, transactions conducted through the Stock Exchange mechanism shall be governed by the operating guidelines and directives issued by respective recognized Stock Exchange(s).

(ii) Investment in Corporate Debt Market Development Fund (CDMDF):

CDMDF is set up as a scheme of the Trust registered as an Alternative Investment Fund ('AIF') in accordance with the SEBI (Alternative Investment Funds) Regulations, 2012 ("AIF Regulations"). The objective of the CDMDF is to help to develop the corporate debt market by providing backstop facilities to instill confidence amongst the market participants in the corporate debt/bond market during times of market dislocation and to enhance the secondary market liquidity. In times of market dislocation, CDMDF shall purchase and hold eligible corporate debt securities from the participating investors i.e. Specified Debt-oriented schemes (i.e. Open-ended Debt oriented Mutual Fund schemes excluding Overnight funds, Gilt fund, Gilt Fund with 10 year constant maturity, Index funds, ETFs and including Conservative Hybrid funds (hereinafter referred to as 'Specified Schemes')) and sell as markets recover.

CDMDF will thus act as a key enabler for facilitating liquidity in the corporate debt market and to respond quickly in times of market dislocation. The trigger and period for which the backstop facility will be open shall be as decided by SEBI. Thus, this backstop facility will help fund managers of the Scheme to generate better liquidity during market dislocation to help the schemes fulfil liquidity obligations under stress situation. In accordance with the requirement of Regulation 43A of SEBI (Mutual Funds) Regulations, 1996 read with SEBI circular no. SEBI/HO/IMD/PoD2/P/CIR/2023/129 dated July 27, 2023, as may be amended from time to time, on Investment by Mutual Fund Schemes in units of CDMDF, the applicable scheme shall invest (as initial contribution) 25 bps of its AUM, in the units

of the Corporate Debt Market Development Fund ('CDMDF'). An incremental contribution to CDMDF shall be made every six months (i.e. at the end of half year ended June and December) at the prevalent NAV of the respective Class Units to ensure 25 bps of scheme's AUM is invested in units of CDMDF. However, if AUM decreases there shall be no return or redemption of units from CDMDF.

Contribution made to CDMDF, including the appreciations on the same, if any, shall be locked in till winding up of the CDMDF. The investments in CDMDF units shall not be considered as violation while considering maturity restriction as applicable for various purposes (including applicable Investment limits) and the calculations of Potential Risk Class (PRC) Matrix, Risk-o-meter, Stress testing and Duration for various purposes shall be done after excluding investments in units of CDMDF.

CDMDF shall not be considered as an "associate" of the Unifi Mutual Fund and investment made in units of CDMDF in accordance with this circular shall not be considered as investment in associate or group company of Unifi Mutual Fund. Contribution made to CDMDF, including the appreciations on the same, if any, shall be locked in till winding up of the CDMDF.

(iii) Liquidity Risk Management (LRM)

The Investment Manager adopts the Liquidity Risk Management framework mandated for open ended debt schemes by SEBI and AMFI which helps estimates liquidity requirement by determining liquidity risk arising from the liability side and tries to cover all potential liquidity risk scenarios up to agreed confidence interval and has mandated remedial measures both for managing the risk on an ongoing basis (LRaR & LCRaR) as well as action plan in case there is a difference between actual outcome and projected outcome. Investors are advised to refer to the AMFI best practice circular 135/ BP/93/ 2021-22 dated July 24, 2021 and subsequent circulars for detailed understanding on the Liquidity Risk Management Framework. Further Investment manager also evaluates and monitors the Asset Liability Mismatch (ALM) which addresses the gap in the estimated potential liquidity requirement over a 90-day period and schemes investment / assets liquidity to meet the potential requirement and assesses that the scheme has necessary liquidity to meets its liability obligations. For asset allocation limits (applicable for following category of schemes in terms of SEBI circular on 'Categorization and Rationalization of Mutual Fund Schemes': Banking and PSU Bond Fund, Floater Fund, Credit Risk Fund and Corporate Bond Funds scheme categories) the base shall be considered as Net assets excluding the extent of minimum stipulated liquid assets.

Investors may note that the minimum investment made by the schemes pursuant to the circular / regulation in compliance with the Corporate Debt Market Development Fund (CDMDF) circular & Liquidity Risk Management framework (LRM) circular mandated by the SEBI may not perform in line with other investment and the investment objective of the schemes and the AMC will not have the option to alter the said investments.

(iv) Potential Risk Matrix (PRC) & Risk-o-meter

Investors are requested to review this scheme's Potential Risk Matrix (PRC) to understand the maximum risk that this scheme will run as per design and & Risk-o-meter to understand periodical measurement of that risk on a regular basis. Investors are suggested to read about various disclosures under the section "PERIODIC DISCLOSURES" pertaining to "Potential Risk Class Matrix" & "Risk-o-meter" to understand in detail the disclosure frequency and remedial measures in case of breaches in the boundaries.

(v) Changes in the tax laws

The tax benefits described in the Scheme Information Document and Statement of Additional Information are as available under the present taxation laws and are available subject to relevant conditions. The information given is included only for general purpose and is based on advise received by the AMC regarding the law and practice currently in force in India and the Unit holders should be aware that the relevant fiscal rules or their interpretation may change. As is the case with any

investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of an investment in any of the Scheme will endure indefinitely. In view of the individual nature of tax consequences, each Unit holder is advised to consult his/her own professional tax advisor.

- (ii) Unifi Mutual Fund/AMC has not authorized any person to give any information or make any representations, either oral or written, not stated in the SID/SAI in connection with issue of units under the Scheme. Prospective investors are advised not to rely upon any information or representations not incorporated in the SAI and SID as the same have not been authorized by the Fund or the AMC . The investor is requested to check the credentials of the individual, firm or other entity he/she is entrusting his/her application form and payment to, for any transaction with the Fund. The Fund shall not be responsible for any incorrect information or misrepresentation done by the intermediaries representing or purportedly representing such investors.

- (vii) The AMC and/ or its Registrars & Transfer Agent (RTA) may disclose/share Unit holder's details of folio(s) and transaction details thereunder with the following third parties:
 - a) RTA, Banks and/or authorized external third parties who are involved in transaction processing, dispatching etc., of the Unitholder's investment in the Scheme;
 - b) Distributors or sub-brokers through whom the applications are received for the Scheme;
 - c) Any other organizations for compliance with any legal or regulatory requirements or to verify the identity of the Unitholders for complying with anti-money laundering requirements.

The transactions carried out on the above platform shall be subject to such guidelines as may be issued by the respective stock exchanges and also SEBI (Mutual Funds) Regulations, 1996 and circulars / guidelines issued thereunder from time to time.

Further in line with Para 16.2 of SEBI Master circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024 it has been decided to allow investors to directly access infrastructure of the recognized stock exchanges to purchase mutual fund units directly from Mutual Fund/ Asset Management Companies. Mutual Funds, Portfolio Managers, Depository Participants, Stock Brokers, Venture Capital Funds, Collective Investors Schemes, etc. Further, to avoid duplication of KYC process across SEBI registered intermediaries, a mechanism for

centralization of the KYC records in the securities market has been developed.

The data from the KRA shall be checked and passed onto the Central Registry of Securitization Asset Reconstruction and Security Interest (CERSAI) for generation of the KYC Identification number (KIN) of the investor. The KYC details of the client can be accessed by other intermediaries by accessing the KRA system. As a result, once the client has done KYC with a SEBI registered intermediary, he need not undergo the same process again with another intermediary. For regulating KRAs, SEBI has formulated the KYC Registration Agency (KRA) Regulations, 2011 which covers the registration of KRAs, functions and responsibilities of the KRAs and intermediaries, code of conduct, data security, etc. However, to comply with prevailing regulatory guidelines, the AMC reserves the right to carryout fresh KYC to the investors or undertake enhanced KYC measures commensuration with the risk profile of the investor.

The IPV carried out by any SEBI registered intermediary can be relied upon.
- e) Investors should note that it is mandatory for all applicants (in the case of application in joint names, each of the applicants) to mention his/her Permanent Account Number (PAN) irrespective of the amount of purchase in the Application Form. Investors who do not have PAN, have to provide other approved proof of identity in lieu of PAN i.e. PAN-exempt KYC reference number (PEKRN) who can invest up to ₹50,000 per year per mutual fund. Where the applicant is a minor, and does not possess his / her own PAN/PEKRN, he / she shall quote the PAN/PEKRN of his/her father or mother or the guardian, as the case may be.
- f) In the event of noncompliance of KYC requirements, the Trustee / AMC reserves the right to freeze the folio of the investor(s) and affect mandatory redemption of unit holdings of the investors at the applicable NAV, subject to payment of exit load, if any.

Annexure A

A. Equity and Related Instruments

1. Traded Securities- Equity and Equity Related Securities (Including Redeemable Preference shares and Cumulative Convertible Preference Share (CCPS), Partly Paid-up Equity Shares & Warrants)
<p>On the valuation day, at the last quoted closing price on the National Stock Exchange (NSE) or Bombay Stock Exchange, where such security is listed. NSE is the Principal Stock Exchange for the purpose of our valuation. If the stock is not traded / quoted on NSE, then the last quoted closing price of BSE or any other stock exchange will be considered.</p> <p>When a security is not traded on any stock exchange on a particular valuation day, the value at which it was traded on NSE or BSE or any other stock exchange, as the case may be, on the earliest previous day may be used provided such date is not more than thirty days prior to the valuation date.</p>
2. Non- Traded Securities
<p>(i) <u>Securities not traded for more than 30 days:</u></p> <p>a. Equity Shares – Valuation price will be in accordance with the SEBI norms i.e. valuation will be computed on the basis of average of book value and the derived value arrived by multiplying Earnings Per Share (EPS) with the discounted Industry PE ratio (25% of the Industry PE Ratio). A further discount of 10% for illiquidity shall be done for arriving at the valuation price. EPS of the last audited annual accounts shall be considered for this purpose.</p> <p>b. Preference Shares: Intrinsic Value will be considered subject to illiquidity discount;</p> <p>(ii) Equity Warrants/Rights Entitlement/Partly paid-up rights shares:</p> <p><u>1. For Equity Warrants / Partly Paid-up rights shares:</u></p> <p>Valuation price will be arrived, after applying appropriate discount (valuation committee delegated power to decide the discounting factor) after reducing the exercise price/issuance price from the closing of the underlying cash equity security.</p> <p><u>2. Rights Entitlement:</u></p> <p>Until they are traded, the value of the rights shares shall be calculated as</p> $V_r = n/m * (P_{ex} P_{of})$ <p>Where</p> <p>V_r = Value of Rights;</p> <p>n = no. of rights;</p> <p>m = no. of original shares held;</p> <p>P_{ex} = Ex-rights price;</p> <p>P_{of} = Rights Offer Price.</p> <p>In case the Rights Offer Price is greater than the ex-rights price, the value of the rights entitlement shall be taken as zero.</p> <p><u>3. Warrants:</u></p> <p>In respect of warrants to subscribe for shares attached to instruments, the warrants will be valued at the value of the share which would be obtained on exercise of the warrant as reduced by the amount which would be payable on exercise of the warrant. The value of</p>

warrant = (Value of underlying shares-exercise price). Appropriate illiquidity discount will be applied to account for the period which must elapse before the warrant can be exercised. If the amount payable on exercise is higher than the value of the share, the value of the warrant should be taken as zero.

4. Partly Paid-up Share:

If the partly paid-up share is not traded on any stock exchange on the date of valuation, then it should be valued at the price derived after reducing the uncalled amount from the Closing price of underlying fully paid-up share. Further Valuation Committee to decide on application of illiquidity discount as deemed appropriate on case-to-case basis.

iii) Demerger:

Where at least one resultant company is not immediately listed, valuation price will be worked out by using cum-price before demerger reduced for quoted price of the listed demerged and/or resultant company(ies) or in case of demerger pending listing, the resultant company/ies shall be valued at the intrinsic value arrived at on the date of corporate action. Alternatively, an independent valuation of the security by any authorised firm shall be obtained.

In case the value of the traded security of the demerged entity is equal to or in excess of the value of that entity before demerger, then the security of the non-traded entity will be valued at zero.

If the resultant companies remained unlisted for more than 3 months, the Valuation Committee to decide on application of illiquidity discount as deemed appropriate on case-to-case basis."

iv) Merger:

"Valuation of a resulting company would be determined by valuation of merging or amalgamating company immediately prior to the ex-date of merger or amalgamation.

(a) In case, merging or amalgamating companies being listed, the valuation of resulting companies would be summation of valuation of entities immediately prior to merger date; further if listed company merges into an unlisted surviving company, then the surviving company would be valued at the traded value of merging company immediately before merger; For example: 1. If company A and B merged to form a new company C, then company C would be value at the price equals to A+B; 2. If company A which is a listed company merges into Company B which is unlisted, would be valued at traded price of A immediately before merger; (b) In case one of the merging or amalgamating companies being unlisted, valuation of resulting companies would be valued on the principles of fair valuation as guided by the valuation committee. If the above companies are unlisted for more than 3 months, valuation committee shall decide on application of illiquidity discount on case-to-case basis."

3. Thinly Traded Securities

When trading in an equity/equity related security in a calendar month is both less than INR 5 lacs and the total volume is less than 50,000 shares, it shall be considered as a thinly traded security. Valuation will be computed on the basis of average of book value and the derived value computed on the basis of the EPS and PE Ratio (with appropriate discount to Industry PE) further discounted for illiquidity.

4. Unlisted Securities (excluding instruments pending for listing)

Unlisted equity shares of a company shall be valued "in good faith" on the basis of the valuation principles laid down below:

- a. Based on the latest available audited balance sheet, net worth shall be calculated as lower of (i) and (ii) below:
 - i. Net worth per share = [share capital plus free reserves (excluding revaluation reserves) minus Miscellaneous expenditure not written off or deferred revenue expenditure, intangible assets and accumulated losses] divided by Number of Paid-up Shares.

<p>ii. After taking into account the outstanding warrants and options, Net worth per share shall again be calculated and shall be = [share capital plus consideration on exercise of Option/Warrants received/receivable by the Company plus free reserves(excluding revaluation reserves) minus Miscellaneous expenditure not written off or deferred revenue expenditure, intangible assets and accumulated losses] divided by {Number of Paid up Shares plus Number of Shares that would be obtained on conversion/exercise of Outstanding Warrants and Options}.</p> <p>The lower of (i) and (ii) above shall be used for calculation of net worth per share and for further calculation in (c) below.</p> <p>b. Average capitalisation rate (P/E ratio) for the industry based upon either BSE or NSE data (which should be followed consistently and changes, if any, noted with proper justification thereof) shall be taken and discounted by 75% i.e. only 25% of the Industry average P/E shall be taken as capitalisation rate (P/E ratio). Earnings per share of the latest audited annual accounts will be considered for this purpose.</p> <p>c. The value as per the net worth value per share and the capital earning value calculated as above shall be averaged and further discounted by 15% for illiquidity so as to arrive at the fair value per share.</p> <p>The above methodology for valuation shall be subject to the following conditions: All calculations as aforesaid shall be based on audited accounts. In case where the latest balance sheet of the company is not available within nine months from the close of the year, unless the accounting year is changed, the shares of such companies shall be valued at zero.</p> <p>iii. If the net worth of the company is negative, the share would be marked down to zero.</p> <p>iv. In case the EPS is negative, EPS value for that year shall be taken as zero for arriving at capitalised earning.</p> <p>In case an individual security accounts for more than 5% of the total assets of the scheme, an independent valuer shall be appointed for the valuation of the said security. To determine if a security accounts for more than 5% of the total assets of the scheme, it should be valued in accordance with the procedure as mentioned above on the date of valuation.</p> <p>vi. At the discretion of the AMC and with the approval of the trustees, an unlisted equity share may be valued at a price lower than the value derived using the aforesaid methodology.</p>
<p>5. Valuation of Illiquid Securities</p>
<p>Aggregate value of “illiquid securities” under a scheme which are defined as non-traded, thinly traded and unlisted equity shares, shall not exceed 15% of the total assets of the scheme and any illiquid securities held above 15% of the total assets shall be assigned as zero value.</p>
<p>6. Lock in Shares</p>
<p>In case of Equity share under lock in for more than 3 months from the date of purchase / allotment, which are traded on the stock exchanges, the investment manager may apply appropriate discount to the closing price quoted on the stock exchange as may be decided by the Valuation Committee on a case to case basis.</p>
<p>7. Application Money for Primary Market Issue</p>
<p>Application money for primary market issue should be valued at cost upto 30 days from the closure of the issue and/or allotment. If the security is not listed within 30 days from the date of closure or allotment, application money is to be valued as per the direction of valuation committee.</p>
<p>8. Suspended Security</p>
<p>In case trading in an equity security is suspended upto 30 days, then the last traded price would be considered for valuation of the security. If an equity security remains suspended for trading on the stock exchanges more than 30 days, then it would be valued as Non-traded security.</p>
<p>9. Inter Scheme Transfer</p>
<p>Inter-scheme would be done at the Price of the security prevailing on the NSE, primary stock exchange at the time of effecting the transfer. If not traded on the primary stock exchange, the closing price of other stock exchange (BSE) will be considered.</p>
<p>10. Derivatives – Futures and Options (traded/non-traded)</p>
<p>On the valuation day, at the settlement price provided by the respective Stock Exchanges.</p>

11. Qualified Institutional Placement (QIP) / Follow on Public Offer (FPO)/ Initial Public offer
In case of QIP and FPO recognition and valuation would start from the date of allotment. In case of IPO the security would be valued at cost from the date of allotment till a day prior to listing and on last quoted closing price (as mentioned above under Traded criteria) from the day of listing.
12. Convertible Debentures
In respect of convertible debentures and bonds, the non-convertible and convertible components shall be valued separately. The non-convertible component (Debt) should be valued on the same basis as would be applicable to a debt instrument. The convertible component (Equity) should be valued on the same basis as would be applicable to an equity instrument/equity derivative. If, after conversion the resultant equity instrument would be traded pari passu with an existing equity instrument which is traded, the value of the latter instrument can be arrived at after an appropriate discount for non-tradability, time value, volatility etc. of the equity instrument during the period preceding the conversion. While valuing such instruments, the fact whether the conversion is optional should also be factored in.
13. Compulsory Convertible Debentures (CCDs)
<p>Until listing, if prices are not available from AMFI approved valuation agencies, it will be valued at cost and appropriate illiquidity discount maybe provided.</p> <p>On listing, valuation will be at the last quoted closing price on NSE.</p> <p>Where the security is not traded on the NSE on a valuation date, the last quoted closing price on BSE may be used. If the security is not traded on both NSE and BSE on a valuation date and the prices are received from valuation agencies, the average prices provided by the agencies will be used.</p> <p>In case the security is not traded for more than 30 days and prices of approved agencies are not available, CCDs will be valued at fair value as per procedures given below:</p> <p>(i) Each CCD shall be converted into such number of Equity shares based on the conversion price arrived in accordance with the offer documents.</p> <p>(ii) In case the CCD has two components viz., one component having bond carrying a coupon rate and second component having an embedded forward contract for compulsory conversion into equity, at a pre-determine formulae, linked to the underlying price of the stock on the exchange, the valuation derived would be a summation of the bond valuation and the Net Present Value (NPV) of the gain/loss on the embedded forward contract for conversion into equity shares.</p> <p>(iii) Valuation of Bonds: The same will be valued as per the framework for debt securities/instruments provided by AMFI until the prices are provided by the valuation agencies.</p> <p>(iv) Valuation of Embedded forward contract for equity conversion: The embedded forward contract has three elements – time value, price movement of the underlying stock and illiquidity risk. The time value (NPV) is the discounting factor, as derived from the bond valuations from valuation agencies.</p> <p>(v) In case the conversion is scheduled after completion of specified period/years as mentioned in the offer documents, the value arrived will be reduced by appropriate illiquidity discount on the gain, if any, as may be specified by SEBI under the applicable guidelines or as may be decided by valuation committee.</p> <p>The valuation committee may exercise it discretion to value the security at a conservative value i.e. at cost or as per the above methodology whichever is lower to ensure fair valuation.</p>

In case there are multiple call options, the lowest value obtained by valuing to the various call dates and valuing to the maturity is to be taken as the value of the instrument.</p> <p>In case of AT1 Bonds, the 'yield to call' would only be considered as per SEBI circular dated August 5, 2024.</p> <p>(b) Securities with Put Option The securities with put option shall be valued at the higher of the value as obtained by valuing the security to final maturity and valuing the security to put option. In case there are multiple put options, the higher value obtained by valuing to the various put dates and valuing to the maturity is to be taken as the value of the instrument.</p> <p>(c) Securities with both put/call option The securities with both put and call option on the same day and having the same put and call price, shall be deemed to mature on that day and valued accordingly. (3) In case no Put Trigger Date or Call Trigger Date is available, then valuation would be done to maturity price. In case one Trigger is available, then valuation would be done as to the said trigger date. In case both trigger dates are available, then valuation would be done to the earliest date. <p>If the put option is not exercised, by a mutual fund when exercising such put option would have been in favour of the scheme, in such cases the justification for not exercising the put option shall be provided to the Board of AMC and Trustees.</p> <p>In respect of valuation of securities with multiple put options present ab-initio wherein put option is factored into valuation of the security by the valuation agency, If the put option is not exercised by a Mutual Fund, while exercising the put option would have been in favour of the scheme;</p> <ol style="list-style-type: none"> 1. A justification for not exercising the put option shall be provided by the Unifi MF to the Valuation Agencies, Board of AMC and Trustees on or before the last date of the notice period. 2. The Valuation Agencies shall not take into account the remaining put options for the purpose of valuation of the security. <p>The put option shall be considered as 'in favour of the scheme' if the yield of the valuation</p>

<p>price ignoring the put option under evaluation is more than the contractual yield/coupon rate by 30 basis points.</p> <p>Note: It is clarified that the maturity of perpetual bonds (Other than bonds issued under Basel III framework) shall be treated as 100 years from the date of issuance of the bond for the purpose of valuation.</p>
<p>3. Valuation of money market and debt securities classified as below investment grade or default.</p>
<p>All money market and debt securities which are rated below investment grade shall be valued at the average of the security level price provided by valuation agencies.</p> <p>Till such time the valuation agencies compute the valuation of money market and debt securities classified as below investment grade, such securities shall be valued by the valuation agencies on the basis of indicative haircuts. These indicative haircuts shall be applied on the date of credit event i.e. migration of the security to sub-investment grade and shall continue till the valuation agencies compute the valuation price of such securities. The indicative hair cut shall also be applied to any accrued interest also. (the indicative haircut communicated by AMFI vide its communication dated April 30, 2019 is given as Note A below).</p> <p>If security is traded, it will be valued at lower of weighted average traded price available on public platform or average of the security level price provided by valuation agencies.</p> <p>In case of trades after the valuation price is computed by the Valuation Agencies as referred above and where the traded price is lower than such computed price, such traded price shall be considered for the purpose of valuation and the valuation price may be revised accordingly.</p> <p>The trades referred above shall be of a minimum size as determined by valuation agencies.</p> <p>In absence of the above information the valuation shall be arrived at basis guidance from Valuation Committee. In case of any deviation from the valuation price for money market and debt securities rated below investment grade provided by the valuation agencies, AMC shall follow the procedure as mentioned in SEBI Circular No SEBI/HO/IMD/DF4/CIR/P/2019/41 dated March 22, 2019 and SEBI Circular No SEBI/HO/IMD/DF4/CIR/P/2019/102 dated September 24, 2019.</p> <p><u>Treatment of Future Recovery</u></p> <p>Any recovery shall be adjusted against the accrued interest recognized in the NAV and any balance shall be adjusted against the value of principal recognized in the NAV. Any recovery in excess of the carried value (i.e. the value recognized in NAV) should then be applied first towards amount of interest written off and then towards amount of principal written off.</p>
<p><u>4. Interest Rate Futures</u></p> <p>The exchange traded Interest Rate Futures would be valued based on the Daily settlement Price or any other derived price provided by the exchange</p>
<p><u>5. Interest Rate Swaps and other Debt OTC Derivatives</u></p> <p>Valuation would be done at average of Price provided by valuation agencies. In absence of Price from valuation agencies, valuation shall be arrived at basis guidance from Valuation Committee.</p>
<p><u>6. Market Linked Debentures</u></p> <p>Valuation would be done at average of Price provided by valuation agencies. In absence of Price from valuation agencies, valuation shall be arrived at basis guidance from Valuation Committee.</p>

7. Bank Fixed Deposits and Overnight Repos/TREPS

Investment in short- term deposits with banks (pending deployment) and overnight repos/ TREPS shall be valued on cost plus accrual basis.

8. Partly Paid Debentures: As Per AMFI Best practice guidelines dated July 26, 2024 following are the guidelines on Investment in Partly Paid debentures:

1. Mutual Fund schemes shall make investment in partly paid debentures only when payment of the remaining amount is linked to clear, pre-defined events (i.e. is subject to conditions precedent). For avoidance of doubt any event which is purely time based shall not be considered as a pre-defined event. Such conditions precedent should be clearly outlined in the Agreement for subscription of the debentures / Offer Document for the issue, as the case may be. Conditions precedent mean the clearly defined obligations / events that need to be fulfilled before calling upon the investor to make payment for the remaining portion of the subscription. Such obligations/ events, to name a few, could include achievement of certain milestones linked with the object for which the debentures were issued or linked to the enhancement of credit rating of the Issuer or linked to other financial or operating parameters of the Issuer or linked to the happening of an event. AMCs shall not resort to the practice of investing in partly paid debentures without any condition precedent.

2. There should not be any linkages across schemes while investing in partly paid debentures. For example: if the agreement for partly paid debentures also envisages investment in any other type of instrument such as a commercial paper then the AMC should ensure that subscription to the residual part of the issue/ the investment in the other instrument is made by the scheme which made the original investment in partly paid debentures.

3. While investing in partly paid debentures, AMCs shall ensure that interest of one set of unitholders/ schemes is not compromised at the cost of another.

4. All regulatory limits have to be complied with at the time of each such part payment.

5. In order to avoid a situation where a MF scheme is unable to honour future part payments, AMCs should avoid excessive concentration in partly paid debentures.

6. Any investment in partly paid debentures has to be disclosed in the monthly portfolio disclosures of the scheme. This should include, inter-alia, the amount that has been contracted but not yet paid by the scheme, the dates of such future pay-ins, triggers for future pay-ins as well as any other detail that in the fund house's view may be of material interest to its investors.

7. Investment in Partly Paid Debenture is subject to a cap on maximum investment of Mutual Fund Scheme at 5% of the AUM of the scheme. However, once the Partly Paid Debentures are fully paid up, the cap on maximum investment of Mutual Fund Scheme at 5% of the AUM of the scheme will not apply.

8. Methodology for valuation of partly paid debentures

(a) Price calculation:

Cash flows are plotted using the details provided in the term sheet. The same is then discounted using YTM derived for that particular ISIN. Prices are sent on face value of Rs 100 (when fully paid), and as per actual paid up value as per valuation date. Cash flows are plotted till actual maturity or deemed maturity (explicit put call option on same date and same value). Two types of securities are available:

a. Pay-in dates and pay-in values are clearly defined – In such case future pay-ins are plotted as per details available in term sheet.

b. Pay in dates and pay in values are not clearly defined or are linked to occurrence of some event or is optional linked to on demand from issuer/investor for making such pay-ins – In such case, since pay-in dates/pay-in values can't be estimated, such future pay-ins are factored on actual basis on receipt of information. (Mutual Funds cannot buy these PPDs as per the AMFI Best Practices Guidelines circular no. 83 dt. 18-Nov-2019 which is clarified in point no 1 as AMCs shall not resort to the practice of investing in partly paid debentures without any condition precedent.)

<p>(b) Yield Calculation: Yields for the ISIN are derived on a daily basis using the standard waterfall approach prescribed for corporate bonds. Definitions of similar maturity, similar issuer, outlier security remains same as other normal securities.</p>
<p>9. AT-1 and Tier 2 issued under Basel III framework. AT-1 and Tier 2 bonds will be valued at average of the security level prices provided the valuation agencies. For arriving at security level pricing, waterfall approach to be following by valuation agencies is provided as Annexure C.</p>
<p>10. Waterfall Mechanism for Valuation of money market and debt and government securities SEBI vide circular no. SEBI/HO/IMD/DF4/CIR/P/2019/102 dated September 24, 2019 has laid down broad principles for waterfall approach to be followed for valuation of debt, money market and government securities. The said circular prescribes AMFI shall ensure valuation agencies have a documented waterfall approach for valuation of Debt & money market securities. The AMFI best practices guidelines circular (135/BP/83/2019-20) dated November 18, 2019 provided guidelines on waterfall approach to be followed for valuation money market and debt securities. The waterfall approach is documented in Annexure B.</p>
<p>11. Changes in the Terms of Investment While making any change to terms of an investment, AMC shall adhere to the following conditions: 1. Any changes to the terms of investment, including extension in the maturity of a money market or debt security, shall be reported to valuation agencies and SEBI registered Credit Rating Agencies (CRAs) immediately, along-with reasons for such changes. 2. Any extension in the maturity of a money market or debt security shall result in the security being treated as "Default", for the purpose of valuation. 3. If the maturity date of a money market or debt security is shortened and then subsequently extended, the security shall be treated as "Default" for the purpose of valuation. 4. Any put option inserted subsequent to the issuance of the security shall not be considered for the purpose of valuation and original terms of the issue will be considered for valuation.</p>
<p>12. Valuation of securities not covered under the current valuation policy. 1. In case of securities purchased by the mutual fund do not fall within the current framework of the valuation of securities then the mutual fund shall report immediately to AMFI regarding the same. Further, at the time of investment AMC shall ensure that the total exposure in such securities does not exceed 5% of the total AUM of the scheme. 2. AMFI has been advised that the valuation agencies should ensure that the valuation of such securities gets covered in the valuation framework within six weeks from the date of receipt of such intimation from mutual fund. 3. In the interim period, till AMFI makes provisions to cover such securities in the valuation of securities framework, the AMC shall value such securities using their proprietary model which has been approved by their independent trustees and the statutory auditors.</p>
<p>13. Treatment of Upfront Fees on Trades As Per AMFI Best practice guidelines dated November 18, 2019, following are the guidelines on Upfront Fees on Trades: 1. Upfront fees on all trades (including primary market trades), by whatever name and manner called, would be considered by the valuation agencies for the purpose of valuation of security. 2. Details of such upfront fees should be shared by the AMC on the trade date to the valuation agencies as part of the trade reporting to enable them to arrive at the fair valuation for that date. 3. For accounting, such upfront fees should be reduced from the cost of the investment in</p>

the scheme that made the investment.
4. In case upfront fees are received across multiple schemes, then such upfront fees should be shared on a pro-rata basis across such schemes.
<p>14. Deviations where the prices given by Valuation Agencies are not considered for valuation.</p> <p>In case AMC decides to deviate from the valuation prices or indicative haircut given by the Valuation Agencies, the detailed rationale for each instance of deviation shall be recorded by the AMC. The rationale for deviation along-with details such as information about the security (ISIN, issuer name, rating etc.), price at which the security was valued vis-a-vis the price as per the Valuation Agencies and the impact of such deviation on scheme NAV (in amount and percentage terms) shall be reported to the Board of AMC and Trustees. The rationale for deviation along-with details mentioned above shall be disclosed immediately and prominently, under a separate head on website of AMC. Further, while disclosing the total number of instances of deviation in the monthly and half-yearly portfolio statements. AMC shall also provide the exact link to the website for accessing the information mentioned above</p>

For Commercial Papers and Certificate of Deposits

Clearcorp F-TRAC Platform of Clearcorp Dealing Systems (India) Ltd. (CDSIL)

Valuation for Inter Scheme Transfer (IST)

Inter-scheme transfer of all debt and money market securities would be done as per the Price provided by valuation agencies for the said purpose.

If Prices from both the valuation agencies are received within the pre-agreed turnaround time (TAT) plus an additional grace time of 30 minutes, an average of the prices so received shall be used for IST.

If Prices from only one valuation agency are received within the agreed TAT plus an additional grace time of 30 minutes, then that Price will be used for IST. In case prices from any of the valuation agencies are received beyond the additional grace time of 30 minutes and are adopted for IST trade, then the same shall be approved by Valuation Committee.

For securities where price is not provided by valuation agencies, the below mentioned approach would be adopted.

For Fixed Income Securities (excluding Government Securities, Treasury Bills, Cash Management Bills, State Development Loans, Ujwal DISCOM Assurance Yojana (UDAY) Bond, etc)

For instruments maturing above 1 year:

For instruments maturing above one year, inter-scheme will be done at the weighted average yield/price of traded securities (excluding IST of others and own trades of Unifi MF) will be considered if there are at least two trades, with each trade being of a minimum of Rs.5 crores face value, aggregating to Rs.25 crores or more for the same or similar security on a public platform*.

For instruments maturing below 1 year:

For instruments maturing below one year, the weighted yield/price of traded securities (excluding IST of others and own trades of Unifi MF) will be taken if there are at least three trades, with each trade being of a minimum of Rs.25 crores face value, aggregating to Rs.100 crores or more for same or similar security on a public platform*.

If there are eligible trades in the same security, the weighted average YTM of these will be considered. If there are no eligible trades in the same security, then weighted average YTM of similar securities will be considered.

Criteria for identifying the similar securities:

Similar security should be identified by the following waterfall logic:

1. Same issuer with maturity date within ± 15 working days of maturity date of security for inter-scheme transfer shall be considered first. If no such instance is available, then Step 2 to be followed: ♣ Example: For inter-scheme transfer of Canara Bank CD maturing on 05-July-2024, all secondary market trades of Canara Bank CD maturing within 14-Jun-2024 to 26-July-2024 will be considered first.
2. Similar security from a different issuer within the same category (PSU Bank, Private Bank or Financial Institution etc) and having same credit rating, with maturity date within ± 15 days of maturity date of security considered for inter-scheme transfer. ♣ Example: For inter-scheme transfer of Canara Bank CD maturing on 26-July-2024, all secondary market trades of similar public sector bank CDs maturing within 05-July-2024 to 16-Aug-2024 having same credit rating will be considered

**** In case of Bank CDs –**

- ❖ Issuer of the securities having long term rating of AAA and/or AA+ and short -term rating of A1+ will be considered as comparable.
- ❖ Issuer of the securities having long term rating of AA and/or AA- and short-term rating of A1+ will be considered as comparable.
- ❖ Issuer of the securities having long term rating of A+ and below and short-term rating of A1+ will be considered as comparable.

Criteria for identifying similar securities in case of securities having residual maturing below 31 days.

Similar security should be identified by the following waterfall logic, provided that the maturity date of the security is within the same calendar quarter and should have a residual maturity up to 30 days:

1. Same issuer and same type of asset, with maturity date withing ± 7 calendar days of maturity date of security shall be considered first and should have a residual maturity upto 30 days. If no such instance is available, then Step 2 will be followed.

Example: For Punjab National Bank CD maturing on March 6, 2025, all secondary market trades of Punjab National Bank CDs, maturing withing February 27, 2025 to March 13, 2025 will be considered first.

2. Similar security from different issuer within the same category (PSU Bank, Private Bank or Financial Institution etc.) and similar long term credit rating**, with maturity date within ± 7 calendar days of maturity date of security will be considered and should have a residual maturity up to 30 days.

Example: For Punjab National Bank CD maturity on March 6, 2025, all secondary market trades of similar public sector bank CDs, maturing within February 27, 2025 to March 15, 2025 will be considered first.

**** In case of Bank CDs –**

- ❖ Issuer of the securities having long term rating of AAA and/or AA+ and short -term rating of A1+ will be considered as comparable.
- ❖ Issuer of the securities having long term rating of AA and/or AA- and short-term rating of A1+ will be considered as comparable.
- ❖ Issuer of the securities having long term rating of A+ and below and short-term rating of A1+ will be considered as comparable.

For the purpose of determining similar securities, the date available on “Bloomberg” will be used as the source for credit ratings. Further, the classifications of the issuers for similar securities will be into three sectors viz., Banking, Manufacturing and Non-Banking Finance Companies (NBFC). Bank CDs will be compared against bank CDs (withing bank CDs, PSU Bank CDs will be compared to PSU Bank CDs and private/foreign bank CDs will be compared with private/foreign bank CDs) Manufacturing papers will be compared against similar manufacturing papers and NBFC will compare against NBFC.

Further, for the purpose of identification of similar securities, in case of security embedded with ‘put and call’ option, only those securities with ‘put and call’ option on the same day and the same ‘put and call’ option price shall be deemed to mature on such put/call date. All other securities with a ‘put and call’ option no meeting these criteria would have the final maturity date of the security considered for the purpose of identification of similar securities.

Notes:

1. Outlier trades, if any will be ignored after recording suitable justification.
2. If due to the non-availability of traded securities, at the time of the IST, the above mentioned criteria cannot be fulfilled, the IST would be done at the previous day’s price/yield.
3. * Public Platform refers to F-TRAC/ Corporate Bond Reporting Platform (CBRICS)/ Indian Corporate Debt Market (ICDM) / Negotiated Dealing System – Order Management (NDS-OM)/MSE FIRST: for corporate bonds/debentures, commercial paper, certificate of deposits and securitized debt (Applicable only for pricing of IST and not for valuation).

Order of preference of public platforms for Bonds will be as follows:

(i) CBRICS; (ii) ICDM and (iii) MSE First

4. Weighted average yield shall be rounded up to two digits after decimal point.

Annexure B

Valuation Policy – Waterfall Mechanism

Part A -Valuation of Money Market and Debt Securities other than G-Secs

SEBI vide circular no. SEBI/HO/IMD/DF4/CIR/P/2019/102 dated September 24, 2019 has laid down broad principles for waterfall approach to be followed for valuation of debt, money market and government securities. The said circular prescribes AMFI shall ensure valuation agencies have a documented waterfall approach for valuation of Debt & money market securities.

The AMFI best practices guidelines circular (135/BP/83/2019-20) dated November 18, 2019 provided guidelines on waterfall approach to be followed for valuation money market and debt securities.

(1) Waterfall Mechanism for valuation of money market and debt securities:

The following shall be the broad sequence of the waterfall for valuation of money market and debt securities:

- (a) Volume Weighted Average Yield (VWAY) of primary reissuances of the same ISIN (whether through book building or fixed price) and secondary trades in the same ISIN.
- (b) VWAY of primary issuances through book building of same issuer, similar maturity (Refer Note 1 below).
- (c) VWAY of secondary trades of same issuer, similar maturity.
- (d) VWAY of primary issuances through fixed price auction of same issuer, similar maturity.
- (e) VWAY of primary issuances through book building of similar issuer, similar maturity (Refer Note 1 below).
- (f) VWAY of secondary trades of similar issuer, similar maturity.
- (g) VWAY of primary issuance through fixed price auction of similar issuer, similar maturity.
- (h) Construction of matrix (polling may also be used for matrix construction)
- (i) In case of exceptional circumstances, polling for security level valuation (Refer Note 2 below)

Note 1

Except for primary issuance through book building, polling shall be conducted to identify outlier trades. However, in case of any issuance through book building which is less than INR 100 Cr, polling shall be conducted to identify outlier trades.

Note 2

Some examples of exceptional circumstance would be stale spreads, any event/news in particular sector/issuer, rating changes, high volatility, corporate action or such other event as may be considered by valuation agencies. Here stale spreads are defined as spreads of issuer which were not reviewed/updated through trades/primary/polls in same or similar security/issuers of same/similar maturities in waterfall approach in last 6 months.

Further, the exact details and reasons for the exceptional circumstances which led to polling shall be documented and reported to AMCs. Further, a record of all such instances shall be maintained by AMCs and shall be subject to verification during SEBI inspections.

Note 3

All trades on stock exchanges and trades reported on trade reporting platforms till end of trade

reporting time (excluding Inter-scheme transfers) should be considered for valuation on that day.

Note 4

It is understood that there are certain exceptional events, occurrence of which during market hours may lead to significant change in the yield of the debt securities. Hence, such exceptional events need to be factored in while calculating the price of the securities. Thus, for the purpose of calculation of VWAY of trades and identification of outliers, on the day of such exceptional events, rather than considering whole day trades, only those trades shall be considered which have occurred post the event (on the same day).

The following events would be considered exceptional events:

- i. Monetary I Credit Policy
- ii. Union Budget
- iii. Government Borrowing I Auction Days
- iv. Material Statements on Sovereign Rating
- v. Issuer or Sector Specific events which have a material impact on yields
- vi. Central Government Election Days
- vii. Quarter end days

In addition to the above, valuation agencies may determine any other event as an exceptional event. All exceptional events along-with valuation carried out on such dates shall be documented with adequate justification.

2. Definition of tenure buckets for Similar Maturity

When a trade in the same ISIN has not taken place, reference should be taken to trades of either the same issuer or a similar issuer, where the residual tenure matches the tenure of the bond to be priced. However, as it may not be possible to match the exact tenure, it is proposed that tenure buckets are created and trades falling within such similar maturity be used as per table below.

Residual Tenure of Bond to be priced	Criteria for similar maturity
Upto 1 month	Calendar weekly Bucket
Greater than 1 month to 3 months	Calendar fortnightly bucket
Greater than 3 months to 1 year	Calendar monthly bucket
Greater than 1 year to 3 years	Calendar quarterly bucket
Greater than 3 years	Calendar half-yearly or Greater bucket

In addition to the above:

a. In case of market events, or to account for specific market nuances, valuation agencies may be permitted to vary the bucket in which the trade is matched or to split buckets to finer time periods as necessary. Such changes shall be auditable. Some examples of market events I nuances include cases where traded yields for securities with residual tenure of less than 90 days and more than 90 days are markedly different even though both may fall within the same maturity bucket, similarly for less than 30 days and more than 30 days or cases where yields for the last week v/s second last week of certain months such as calendar quarter ends can differ.

b. In the case of illiquid/ semi liquid bonds, it is proposed that traded spreads be permitted to be used for longer maturity buckets (1year and above). However, the yield should be adjusted to account for steepness of the yield curve across maturities.

c. The changes I deviations mentioned in clauses a and b, above, should be documented, along with the detailed rationale for the same. Process for making any such deviations shall also be recorded. Such records shall be preserved for verification.

3. Process for determination of similar issuer

Valuation agencies shall determine similar issuers using one or a combination of the following criteria. Similar issuer does not always refer to issuers which trade at same yields but may carry spreads amongst themselves & move in tandem or they are sensitive to specific market factor/s hence warrant review of spreads when such factors are triggered.

- i. Issuers within same sector/industry and/or
- ii. Issuers within same rating band and/or
- iii. Issuers with same parent/ within same group and/or
- iv. Issuers with debt securities having same guarantors and/or
- v. Issuers with securities having similar terms like Loan Against Shares (LAS)/ Loan Against Property (LAP).

The above criteria are stated as principles and the final determination on criteria, and whether in combination or isolation shall be determined by the valuation agencies. The criteria used for such determination should be documented along with the detailed rationale for the same in each instance. Such records shall be preserved for verification. Similar issuers which trade at same level or replicate each other's movements are used in waterfall approach for valuations. However, similar issuer may also be used just to trigger the review of spreads for other securities in the similar issuer category basis the trade/ news/action in any security/ies within the similar issuer group.

4. Recognition of trades and outlier criteria

1. Volume criteria for recognition of trades (marketable lot)

Paragraph 1.1.1.1(a) of SEBI vide circular no. SEBI/HO/IMD/DF4/CIR/P/2019/102 dated September 24, 2019 on Valuation of money market and debt securities, prescribes that the marketable lots shall be defined by AMFI, in consultation with SEBI.

In this regard, marketable lot is defined as under.

The following volume criteria shall be used for recognition of trades by valuation agencies:

Parameter	Minimum Volume Criteria for marketable lot
Primary	INR 25 cr. for both Bonds/NCD/CP/CD and other money market instruments
Secondary	INR 25 cr. for CP/ CD, T-Bills and other money market instruments
Secondary	INR 5 Cr for Bonds/NCD/G-secs

Trades not meeting the minimum volume criteria i.e. the marketable lot criteria as stated above shall be ignored.

ii. Outlier Criteria

It is critical to identify and disregard trades which are aberrations, do not reflect market levels and may potentially lead to mispricing of a security or group of securities. Hence, the following broad principles would be followed by valuation agencies for determining outlier criteria.

- a. Outlier trades shall be classified on the basis of liquidity buckets (Liquid, Semi-liquid, and Illiquid). Price discovery for liquid issuers is generally easier than that of illiquid issuers and hence a tighter pricing band as compared to illiquid issuers would be appropriate.
- b. The outlier trades shall be determined basis the yield movement of the trade, over and above the yield movement of the matrix. Relative movement ensures that general market movements are

accounted for in determining trades that are outliers. Hence, relative movement over and above benchmark movement shall be used to identify outlier trades.

c. Potential outlier trades which are identified through objective criteria defined above will be validated through polling from market participants. Potential outlier trades that are not validated through polling shall be ignored for the purpose of valuation.

d. The following criteria shall be used by valuation agencies in determining Outlier Trades

Liquidity Classification	Bps Criteria (yield movement over Previous Day yield after accounting for yield movement for matrix)		
	Upto 15 days	15-30 days	Greater than 30days
Liquid	30 bps	20 bps	10 bps
Semi-Liquid	45 bps	35 bps	20 bps
Illiquid	70 bps	50 bps	35 bps

The above criteria shall be followed consistently and would be subject to review on a periodic basis by valuation agencies and any change would be carried in consultation with AMFI.

a. In order to ensure uniform process in determination of outlier trades the criteria for liquidity classification shall be as detailed below.

Liquidity classification criteria - liquid, semi-Liquid and Illiquid definition

Valuation agencies shall use standard criteria for classifying trades as Liquid, Semi-Liquid and illiquid basis the following two criteria.

a. Trading Volume

b. Spread over reference yield

Such criteria shall be reviewed on periodic basis in consultation with AMFI.

Trading Volume (Traded days) based criteria:

Number of unique days an issuer trades in the secondary market or issues a new security in the primary market in a calendar quarter

- Liquid $\geq 50\%$ of trade days
- Semi liquid $\geq 10\%$ to 50% of trade days
- Illiquid $< 10\%$ of trade days

Spread based criteria:

Spread over the matrix shall be computed and based on thresholds defined, issuers shall be classified as liquid, semi liquid and illiquid. For bonds thresholds are defined as up to 15 bps for liquid; $>15-75$ bps for semi-liquid; > 75 bps for illiquid. (Here, spread is computed as average spread of issuer over AAA Public Sector Undertakings/Financial Institutions/Banks matrix),

For CP/ CD- up to 25 bps for liquid; $>25- 50$ bps for semiliquid; >50 bps for illiquid. (Here, spread is computed as average spread of issuer over A1+/AAA CD Bank matrix).

The thresholds shall be periodically reviewed and updated having regard to the market.

The best classification (liquid being the best) from the above two criteria (trading volume and spread based) shall be considered as the final liquidity classification of the issuer. The above classification shall be carried out separately for money market instruments (CP/ CDs) and bonds.

5. Process for Construction of Matrix

Valuation agencies shall follow the below process in terms of calculating spreads and constructing the matrix:

Steps	Detailed Process
Step 1	<p>Segmentation of corporates the entire corporate sector is first categorised across following four sectors i.e. all the corporates will be catalogued under one of the below mentioned bucket:</p> <ol style="list-style-type: none"> 1. Public Sector Undertakings/Financial Institutions/Banks; 2. Non-Banking Finance Companies -except Housing Finance Companies; 3. Housing Finance Companies; 4. Other Corporates
Step 2	<p>Representative issuers –</p> <p>For the aforesaid 4 sectors, representative issuers (Benchmark Issuers) shall be chosen by the valuation agencies for only higher rating {I.e. "AAA" or AA+}. Benchmark/Representative Issuers will be identified basis high liquidity, availability across tenure in AAA/AA+ category and having lower credit/liquidity premium. Benchmark Issuers can be single or multiple for each sector.</p> <p>It may not be possible to find representative issuers in the lower rated segments, however in case of any change in spread in a particular rating segment, the spreads in lower rated segments should be suitably adjusted to reflect the market conditions.</p> <p>In this respect, in case spreads over benchmark are widening at a better rated segment, then adjustments should be made across lower rated segments, such that compression of spreads is not seen at any step. For instance, if there is widening of spread of AA segment over the AAA benchmark, then there should not be any compression in spreads between AA and A rated segment and so on.</p>
Step 3	<p>Calculation of benchmark curve and calculation of spread –</p> <ol style="list-style-type: none"> 1. Yield curve to be calculated for representative issuers for each sector for maturities ranging from 1month till 20 years and above. 2. Waterfall approach as defined in Part A (1) above will be used for construction of yield curve of each sector. 3. In the event of no data related to trades/primary issuances in the securities of the representative issuer is available, polling shall be conducted from market participants 4. Yield curve for Representative Issuers will be created on daily basis for all 4 sectors. All other issuers will be pegged to the respective benchmark issuers depending on the sector, parentage and characteristics. Spread over the benchmark curve for each security is computed using latest available trades/primaries/polls for respective maturity bucket over the Benchmark Issuer. 5. Spreads will be carried forward in case no data points in terms of trades/primaries/polls are available for any issuer and respective benchmark movement will be given.
Step 4	<ol style="list-style-type: none"> 1. The principles of VWAY, outlier trades and exceptional events shall be applicable while constructing the benchmark curve on the basis of trades/primary issuances. 2. In case of rating downgrade/credit event/change in liquidity or any other material event in Representative Issuers, new Representative Issuers will be identified. Also, in case there are two credit ratings, the lower rating to be considered. 3. Residual tenure of the securities of representative issuers shall

	be used for construction of yield curve.

Part B: Valuation of G-Secs (T-Bill, Cash management bills, G-Sec and SDL)

The following is the waterfall mechanism for valuation of Government securities:

- VWAY of last one hour, subject to outlier validation
- VWAY for the day (including a two quote, not wider than 5 bps on NDSOM), subject to outlier validation
- Two quotes, not wider than 5 bps on NDSOM, subject to outlier validation
- Carry forward of spreads over the benchmark
- Polling etc.

Note:

1. VWAY shall be computed from trades which meet the marketable lot criteria stated in Part A of these Guidelines.
2. Outlier criteria: Any trade deviating by more than +/- 5 bps post factoring the movement of benchmark security shall be identified as outlier. Such outlier shall be validated through polling for inclusion in valuations. If the trades are not validated, such trades shall be ignored.

Annexure C

Valuation of AT-1 and Tier II Bonds issued under Basel III framework.

I. Deemed Residual Maturity Bonds

The Deemed Residual Maturity for the purpose of valuation as Macaulay Duration for existing as well new perpetual bonds issued:

Time Period	Deemed Residual Maturity (Years)
March 31, 2023 onwards	100

The Macaulay Duration is proposed to be calculated as under the Tier II Bonds:

Time Period	Deemed Residual Maturity for all securities (Years)
April 01, 2022 onwards	Actual Maturity

1. If the issuer does not exercise call option for any ISIN, then maturity of bonds to be considered as 100 years from the date of issuance of the AT-1 Bonds and contractual maturity of Tier II – Bonds for all the ISINs of the said issuer.
2. If the non-exercise of call option is due to financial stress or in case of adverse news, the same must be reflected in the valuation.

II. Guidelines for Valuation

1. Form two types of ISINs:

- a) Benchmark ISINs (a non-benchmark ISIN can be linked to only one benchmark ISIN. Currently, SBI ISINs happen to be the benchmark ISINs across all maturities of AT-1 Bonds).
- b) Non-benchmark ISINs. (will be divided into multiple groups based on similar issuer and similar maturity).
- c) The groups will be decided in consultation with valuation agencies. The two main criteria envisaged to be used here would be Tier 1/ Tier 2 ratings of the ISINs/Issuers, and the spread range in which the group of ISINs/Issuer's trade over the benchmark.

2. Take a look back period for trade recognition w.e.f October 1, 2021, as under

- a) 7 (Previously 15) working days for benchmark ISINs
- b) 15 (Previously 30) working days for non-benchmark ISINs

Note 1

- a) If the ISIN gets traded, the traded YTM will be taken for the purpose of valuation.
- b) IF 1 ISIN of the issuer trades, all other ISINs of issuers will be considered as traded but with necessary adjustment of spread to YTM.
- c) IF none of the ISIN of the issuer get trade, the trade of similar issuer in the group will be taken for valuation. However, with necessary adjustment of spread to YTM of similar issuer similar maturity. IF none of the ISIN in a group gets traded on any particular day, an actual trade in a look back period will be seen.
- d) If there is an actual trade in look back period, the security will be considered as traded and valued with necessary adjustment of spread to YTM. According to this valuation will be done based on the trade of issuer, trade of another issuer and as an additional layer a look back period of is requested. It is confirmed the spread over YTM will be taken without any adjustment of modified duration to call.

Note 2

As the valuation is based on trade during the look back period, it is confirmed that a spread will be adjusted to reflect adverse news, change in credit rating, interest rate etc., which has bearing on the yield of ISIN being valued.

Note 3

If there is no actual trade of any ISIN of the issuer as well as similar issuer during look back period also, then valuation will be done by taking spread over matrix and/or polling in line with the water mechanism prescribed by AMFI.

Note 4

AT-1 and Tier 2 Bonds being different categories of bonds, the valuation of these bonds will be done separately. i.e. ISIN of AT-1 bond traded will not mean that ISIN of Tier -2 bonds of the same issuer have also been traded. However, if any issuer does not exercise call option for any ISIN, then the valuation and calculation of Macaulay Duration should be done considering maturity of 100 years from the date of issuance for AT-1 Bonds and Contractual Maturity for Tier 2 bonds, for all ISINs of the issuer.

COMPUTATION OF NAV

A. Policy of computation of NAV and Policy for computation of NAV in foreign Securities

The AMC shall compute NAV of the Units of the Scheme by dividing the net assets of the Scheme by the number of Units outstanding on the valuation date. The AMC shall value its investments according to the valuation norms (Valuation Policy includes computation of NAV in case of investment in foreign securities), as specified in the Eighth Schedule of the Regulations, or such guidelines / recommendations as may be specified by SEBI from time to time.

a. NAV of Units under the Scheme will be calculated as shown below:

NAV=	Market or Fair Value of Scheme's investments	+	Current assets including Income	-	Current Liabilities and provisions including accrued expenses
	No. of Units outstanding under the Scheme/Option				

b. NAV for the Scheme and the repurchase prices of the Units will be calculated and announced at the close of each Business Day. The NAV shall be computed upto four decimals. The NAV of Direct Plan will be different than the NAV of Regular Plan. The income earned and the profits realized in respect of the Units issued under the Growth Option remain invested and are reflected in the NAV of the Units.

c. Illustrations for computation of NAV:

Market or Fair Value of Scheme's investments= Rs. 10,00,00,000

Current assets including accrued income = Rs. 10,00,000

Current Liabilities and provisions including accrued expenses = Rs.2,00,000

No. of units outstanding under the scheme = 10000000

Hence NAV of the scheme will be = Rs. 10.0800

As required under the Regulations, the asset management company shall ensure that the repurchase price of an open-ended scheme shall not be lower than 95% of the Net Asset Value.

- d. In case of schemes is having IDCW option, computation of NAV will be done after taking into account IDCWs paid, if any, and the distribution tax thereon, if applicable. Therefore, once IDCWs are distributed under the IDCW Option, the NAV of the Units under the IDCW Option would always remain lower than the NAV of the Units issued under the Growth Option.
- e. Timelines for disclosure of NAV, as per para 8.1 and 8.2 of SEBI Master Circular dated June 27, 2024 is tabulated below:

For firm, co-operative society and local authority at the rate of 12% on tax where the taxable income exceeds Rs. 1 crore (Marginal relief in surcharge, if applicable)

1 The FA 2020 caps the surcharge on “dividend”. It appears for this purpose that dividend would mean dividend from equity shares and may not cover dividend from mutual fund schemes/income distributed by mutual funds. This is because the Income-tax Act in several places refers to dividend from equity shares as “dividend” and dividend from mutual fund as “income distributed by mutual fund”. Income distribution by mutual fund is technically not regarded as dividend. Based on such approach, “mutual fund dividend” is subject to super-rich surcharge.

¹ The FA 2020 caps the surcharge on “dividend”. It appears for this purpose that dividend would mean dividend from equity shares and may not cover dividend from mutual fund schemes/income distributed by mutual funds. This is because the Income-tax Act in several places refers to dividend from equity shares as “dividend” and dividend from mutual fund as “income distributed by mutual fund”. The MLI, amongst others, includes a "principal purpose test", wherein Tax Treaty benefits can be denied if one of the principal purpose of an arrangement or a transaction was to, directly or indirectly, obtain tax benefit. The MLI has also expanded the scope of permanent establishment to include agent (excluding an independent agent) playing principal role, leading to routine conclusion of contracts without material modification. For this purpose, an agent is not considered independent if it acts exclusively or almost exclusively on behalf of one or more closely related enterprises. India has been an active participant in the entire discussion and its involvement in the BEPS project has been intensive. In a ceremony held in Paris on 7 June 2017, various countries including India, signed the MLIs.

In terms of FATCA, foreign financial institutions (FFIs) are required to report information about financial accounts held by US taxpayers (even if they hold only non-US assets) or held by foreign entities in which US taxpayers hold a substantial ownership interest.

The Government of India and US Government have signed an Inter-Governmental Agreement (IGA) on July 9, 2015, to implement FATCA. Pursuant to the reporting requirements mandated under FATCA.

Further, the Mutual Fund (through its agents or service providers) may report the information related to the investment of any investor to the US tax authorities (or to an Indian agency as notified, once India signs the intergovernmental agreement with US) and redeem and/or apply withholding tax to payments to investors who fail to provide the information and documents required to identify their status, or are non-FATCA compliant financial institutions or fall within other categories specified in the FATCA provisions and regulations. Investors should consult their own tax advisors regarding the applicability of FATCA requirements to them.

With respect to individuals, the US reportable accounts would cover those with US citizenship or US

residency. One may note that in US, both US citizens and residents are taxed on their worldwide income. With respect to entities, FATCA requires reporting in relation to specified US persons (Eg. US partnerships, private corporations) as well as passive Non-Financial Foreign Entities (NFFEs) in which controlling interest is held by specified US person. The identification of US person will be based on one or more of the following –US “indicia”

- Unambiguous indication of a US place of birth;
- Current US mailing or residence address (including a US post office box)

The G20 and OECD countries have together developed a CRS on automatic exchange of information (“AEOI”). The CRS on AEOI was presented to G20 Leaders in Brisbane on 16th November, 2014. On June 3, 2015, India has joined the multilateral competent authority agreement (MCAA) on AEOI. The CRS on AEOI requires the financial institutions of the source jurisdiction to collect and report information to their tax authorities about account holders - residents in other countries, such information having to be transmitted - automatically annually. The information to be exchanged relates not only to individuals, but also to shell companies and trusts having beneficial ownership or interest on the residential countries.

Appropriate rules have been notified to implement CRS and FATCA. In view of India’s commitment to implement the CRS on AEOI and also the IGA with USA, and with a view to provide information to other countries, necessary legislative changes have been made through Finance (No. 2) Act, 2014, by amending section 285BA of the Income –tax Act, 1961. Income tax Rules, 1962 were amended vide notification No. 62 of 2015 dated 7th August, 2015 by inserting Rules 114F to 114H and Form 61B to provide a legal basis for the Reporting Financial Institutions (RFIs) for maintaining and reporting information about the Reportable Accounts.

5. Portfolio Turnover Details

For open-ended scheme, it is expected that there would be a number of subscriptions and redemptions on a daily basis. Consequently, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio. There may be an increase in transaction cost such as brokerage paid, if trading is done frequently. Frequent trading may increase the profits which will offset the increase in costs. The fund manager will endeavor to optimize portfolio turnover to maximize gains and minimize risks keeping in mind the cost associated with it. However, it is difficult to estimate with reasonable accuracy, the likely turnover in the portfolio of the Scheme. The Schemes has no specific target relating to portfolio turnover.

D. Information pertaining to Investments by the Schemes of the Fund

1. Derivative Strategies

Investments in Derivatives shall be in accordance with the guidelines as stated under Para 7.5, 7.6 and 12.25 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 June 27, 2024 as may be amended from time to time.

Investment in Derivatives

As part of the Fund Management process, the schemes, may use derivative instruments such as index futures and options, stock futures and options contracts, or any other derivative instruments that are permissible or may be permissible in future under applicable regulations and such investments shall be in accordance with the investment objectives of the Scheme.

Equity Derivatives

The Scheme(s) may use various equity derivatives from time to time, as would be available and permitted by SEBI, in an attempt to protect the value of the portfolio and enhance unitholder's interest. Accordingly, the Scheme(s) may use derivative instruments like futures & options stock indices, future & options on individual securities or such other derivative instruments as may be introduced from time to time as permitted under the SEBI (Mutual Funds) Regulations, 1996.

Illustration of some derivative transactions

i) Stock/Index Futures:

Investment in Stock / Index Futures can give exposure to the stock/index without directly buying the individual stocks. Appreciation in Index / stocks can be effectively captured through investment in Stock / Index Futures. The Scheme can sell futures to hedge against market movements effectively without actually selling the stocks it holds.

Illustration

Spot Index: 2070

1-month Nifty Future Price on day 1: 2075 Scheme buys 100 lots

Each lot has a nominal value equivalent to 200 units of the underlying index.

Situation 1:

Let us say that on the date of settlement, the future price = Closing spot price = 2085 Profits for the Scheme = $(2085-2075) * 100 \text{ lots} * 200 = \text{Rs. } 200,000$

Situation 2:

Let us say that on the date of settlement, the future price = Closing spot price = 2065

Loss for the Fund = $(2065-2075) * 100 \text{ lots} * 200 = (\text{Rs. } 200,000)$

Please note that the above example is given for illustration purposes only.

The net impact for the scheme will be in terms of the difference between the closing price of the index and cost price (ignoring margins and transaction costs for the sake of simplicity).

Basic Structure of a Stock & Index Future

The Stock Index futures are instruments designed to give exposure to the equity markets indices. BSE Limited (BSE) and National Stock Exchange of India Limited (NSE) provide futures in select stocks and indices with various maturity buckets. The pricing of a stock/index future is the function of the underlying stock/index and short-term interest rates.

Buying Options:

Benefits of buying a call option: Buying a call option on a stock or index gives the owner the right, but not the obligation, to buy the underlying stock / index at the designated strike price. Here the downside risks are limited to the premium paid to purchase the option.

Illustration

For example, if the Scheme buys a one-month call option on A Limited at a strike of Rs. 250, the current market price being say Rs.251. The Scheme will have to pay a premium of say Rs. 15 to buy this call. If the stock price goes below Rs. 250 during the tenure of the call, the Scheme avoids the loss it would have incurred had it straightaway bought the stock instead of the call option. The Scheme gives up the premium of Rs. 15 that has to be paid in order to protect the fund from this probable downside. If the stock goes above Rs. 250, it can exercise its right and own A Limited at a cost price of Rs. 250, thereby participating in the upside of the stock.

Benefits of buying a put option: Buying a put option on a stock originally held by the buyer gives him/her the right, but not the obligation, to sell the underlying stock at the designated strike price. Here the downside risks are limited to the premium paid to purchase the option.

Basic Structure of an Option

An option gives a buyer the right but does not cast the obligation to buy or sell the underlying. An option is a contract between two parties wherein the buyer receives a privilege for which he pays a fee (premium), and the seller accepts an obligation for which he receives a fee. The premium is the price negotiated and set when the option is bought or sold. A person who buys an option is said to be long in the option. A person who sells (or writes) an option is said to be short in the option.

Option Contracts (Stock and Index)

In the global financial markets, particularly securities markets, options have been, for quite many years, a means of conveying rights from one party to another at a specified price on or before a specific date, at a cost, which is called Premium. The underlying instrument can be an individual stock or a stock index such as the BSE Sensex (such options being referred to as index options). Options are used widely the world over to manage risk and generate income. Options may be preferred over futures as they provide asymmetric pay offs.

There are broadly two kinds of Options trade viz. Long & Short.

A Long Call is buying a Call option to purchase the stock at a later date at a fixed price called the strike price.

A Long Put on the other hand is buying Put option i.e. an option to sell the stock at a later date at the strike price.

Similarly, A Short Call is selling a Call option which is also called writing a Call option by which the option writer has an obligation to sell the stock to the call buyer at the strike price.

A Short Put is to sell or write a Put option i.e. an obligation to buy the stock from the Put buyer at the strike price. The specified price at which the shares are contracted to be purchased or sold is called the strike price. Options that can be exercised on or before the expiration date are called American Options, while those that can be exercised only on the expiration date are called European Options. Option contracts are designated by the type of option, name of the underlying, expiry month and the strike price.

Writing of Covered Call Options by Mutual Fund Schemes:

- a. Mutual Fund schemes (except Index Funds and ETFs) may write call options only under a covered call strategy for constituent stocks of NIFTY 50 and BSE SENSEX subject to the following:
- b. The total notional value (taking into account strike price as well as premium value) of call options written by a scheme shall not exceed 15% of the total market value of equity shares held in that scheme.
- c. The total number of shares underlying the call options written shall not exceed 30% of the unencumbered shares of a particular company held in the scheme. The unencumbered shares in a scheme shall mean shares that are not part of Securities Lending and Borrowing Mechanism (SLBM), margin or any other kind of encumbrances.
- d. At all points of time the Mutual Fund scheme shall comply with the provisions at paragraph (a) and (b) above. In case of any passive breach of the requirement at paragraph (a), the respective scheme shall have 7 trading days to rebalance the portfolio. During the rebalancing period, no additional call options can be written in the said scheme.
- e. In case a Mutual Fund scheme needs to sell securities on which a call option is written under a covered call strategy, it must ensure compliance with paragraphs (a) and (b) above while selling the securities.
- f. In no case, a scheme shall write a call option without holding the underlying equity shares. A call option can be written only on shares which are not hedged using other derivative contracts.
- g. The premium received shall be within the requirements prescribed in terms of paragraph 5 of SEBI circular dated August 18, 2010 i.e. the total gross exposure related to option premium paid and received must not exceed 20% of the net assets of the scheme.

h. The exposure on account of the call option written under the covered call strategy shall not be considered as exposure in terms of paragraph 3 of SEBI Circular no. Cir/IMD/DF/11/2010, dated August 18, 2010.

i. The call option written shall be marked to market daily and the respective gains or losses factored into the daily NAV of the scheme until the position is closed or expired.

As and when SEBI notifies amended limits in position limits for exchange traded derivative contracts in future, the aforesaid position limits, to the extent relevant, shall be read as if they were substituted with the SEBI amended limits.

Various Derivatives Strategies:

If and where Derivative strategies are used under the scheme the Fund Manager may employ a combination of the following strategies:

1. Index Arbitrage:

Example: Nifty 50 Index. As the Nifty 50 Index derives its value from fifty underlying stocks, the underlying stocks can be used to create a synthetic index matching the Nifty Index levels. Also, theoretically, the fair value of a stock/ index futures is equal to the spot price plus the cost of carry i.e., the interest rate prevailing for an equivalent credit risk, in this case is the Clearing Corporation of the NSE. Theoretically, therefore, the pricing of Nifty Index futures should be equal to the pricing of the synthetic index created by futures on the underlying stocks. However, due to market imperfections, the index futures may not exactly correspond to the synthetic index futures. The Nifty Index futures normally trades at a discount to the synthetic Index due to large volumes of stock hedging being done using the Nifty Index futures giving rise to arbitrage opportunities. The fund manager shall aim to capture such arbitrage opportunities by taking long positions in the Nifty Index futures and short positions in the synthetic index. The strategy is attractive if this price differential (post all costs) is higher than the investor's cost-of-capital. Objective of the Strategy The objective of the strategy is to lock in the arbitrage gains.

2. Cash Futures Arbitrage: (Only one way as funds are not allowed to short in the cash market).

The Scheme/s would look for market opportunities between the spot and the futures market. The cash futures arbitrage strategy can be employed when the price of the futures exceeds the price of the underlying stock. The Scheme will first buy the stocks in the cash market and then sell in the futures market to lock the spread known as arbitrage return. Buying the stock in the cash market and selling the futures results into a hedge where the Plans have locked in a spread and is not affected by the price movement of cash market and futures market. The arbitrage position can be continued till expiry of the future contracts. The future contracts are settled based on the last half an hour's weighted average trade of the cash market. Thus, there is a convergence between the cash market and the futures market on expiry. The strategy is attractive if this price differential (post all costs) is higher than the investor's cost-of-capital. Objective of the Strategy is to lock in the arbitrage gains.

3. Hedging and alpha strategy:

The fund may use exchange-traded derivatives to hedge the equity portfolio. The hedging could be either partial or complete depending upon the fund managers' perception of the markets. The fund manager shall either use index futures and options or stock futures and options to hedge the stocks in the portfolio. The fund may seek to generate alpha by superior stock selection and removing market risks by selling appropriate index. For example, one can seek to generate positive alpha by buying an IT stock and selling Nifty IT Index future or a bank stock and selling Bank Index futures or buying a

stock and selling the Nifty Index. Objective of the Strategy The objective of the strategy is to generate alpha by superior stock selection and removing market risks by hedging with an appropriate index.

4. Other Derivative Strategies:

As allowed under the SEBI guidelines on derivatives, the fund manager may employ various other stock and index derivative strategies by buying or selling stock/index futures and/or options.

Objective of the Strategy The objective of the strategy is to earn low volatility consistent returns.

5. Covered Call Strategy:

A call option gives the holder (buyer) the right but not the obligation to buy an asset by a certain date for a certain price. The covered call is a strategy in which a seller sells a call option on a stock he owns.

Benefits of using Covered Call strategy in Mutual Funds: The covered call strategy can be followed by the Fund Manager in order to hedge risk thereby resulting in better risk adjusted returns of the Scheme.

The strategy offers the following benefits:

- Hedge against market risk - Since the fund manager sells a call option on a stock already owned by the mutual fund scheme, the downside from fall in the stock price would be lower to the extent of the premium earned from the call option.
- Generating additional returns in the form of option premium in a range bound market. Thus, a covered call strategy involves gains for unit holders in case the strategy plays out in the right direction.

Illustration – Covered Call strategy using stock call options: Suppose a fund manager buys equity stock of ABC Ltd. For Rs. 1000 and simultaneously sells a call option on the same stock at a strike price of Rs. 1100. The scheme earns a premium of say, Rs. 50. Here, the fund manager does not think that the stock price will exceed Rs. 1100.

Scenario 1: Stock price exceeds Rs. 1100

The call option will get exercised, and the fund manager will sell the stock to settle his obligation on the call at Rs.1100 (earning a return of 10% on the stock purchase price). Also, the scheme has earned a premium of Rs. 50.

Net Gain –

Rs. 1100 (strike price) – Rs. 1000 (stock purchase price) + Rs. 50 (premium earned) = Rs. 150 .

Scenario 2: Stock prices stay below Rs. 1100

The call option will not get exercised and will expire worthless. The premium earned on call option will generate alpha for the scheme.

Net Gain – Rs. 50 (premium earned).

Fixed Income Derivatives

Interest Rate Swap (IRS)

IRS is a widely used derivative product in the financial markets to manage interest rate risk. A typical transaction is a contract to exchange streams of interest rate obligation/income on a notional principal amount with a counter party, usually a bank. The two interest streams are, fixed rate on one side and floating rate on the other.

Example: Suppose the Fund holds a fixed rate bond of maturity 5 years carrying a fixed interest rate (YTM) of 7.25% p.a. payable half yearly. Such an investment runs the risk of depreciation if interest rates rise. To manage this risk, the Fund can enter into an IRS with another market participant, here the Fund contracts to pay fixed rate, say 6.85% p.a., and receive a floating rate (say overnight MIBOR). This transaction is done for a notional principal amount equal to the value of the investment. By such a contract a fixed rate income is offset by a fixed rate payment obligation leaving only a floating rate income stream. Thus, without actually investing in a floating rate asset, the Fund starts earning a floating rate income, reducing the risk of depreciation associated with the fixed rate investment. Following table summarises the cash flow streams:

Original investment : 7.25% p.a.

Pay (Fixed rate) : 6.85% p.a. (IRS)

Receive (Floating rate) : MIBOR

Net Flow : MIBOR + 0.40% p.a. (*)

* (7.25% p.a. – 6.85 % p.a.)

The floating rate reference is defined in the swap agreement.

The above example illustrates a case of fixed to floating rate swap. A swap could be done to move from floating rate to fixed rate in a similar fashion.

Please note that the above example is hypothetical in nature and the interest rates are assumed. The actual return may vary based on actual and depends on the interest rate prevailing at the time the swap agreement is entered into.

The Scheme will be allowed to take exposure in Interest Rate Swaps only on a non-leveraged basis. A swap will be undertaken only if there is an underlying asset in the portfolio.

The Scheme may use other derivatives such as interest rate futures, etc, to meet the investment objective of the Scheme, whenever such instruments are available in the market.

Interest Rate Futures

IRF means a standardized interest rate derivative contract traded on a recognized stock exchange to buy or sell a notional security or any other interest bearing instrument or an index of such instruments or interest rates at a specified future date, at a price determined at the time of the contract. Hedging using interest rate futures could be perfect or imperfect, subject to applicable regulations. Currently, exchange traded Interest Rate Futures traded on exchange are standardized contracts based on 10-Year Government of India Security and 91 day Treasury bill. IRF contracts are cash settled. IRFs give an opportunity in the fixed income market to hedge interest rate risk or rebalance the portfolio by using them. By locking into a price, the IRF contract can help to eliminate the interest rate risk. Thus, in order to protect against a fall in the value of the portfolio due to falling bond prices, one can take short position in IRF contracts.

Example:

Date: May 01, 2024 Spot price of the Government Security: Rs.105 Price of IRF– Jan contract: Rs. 105.5
On Jan 01, 2024, Fund buys 100 units of the Government security from the spot market at Rs. 105. Subsequently, it is anticipated that the interest rate will rise in the near future. Therefore to hedge the exposure in underlying Government security, Fund sells May 2024 Interest Rate Futures contracts at Rs. 105.5. On May 15, 2024 due to increase in interest rate: Spot price of the Government Security: Rs. 104

Futures Price of IRF Contract: Rs.104.2

Loss in underlying market will be $(105 - 104) \times 100 = \text{Rs. } 100$

Profit in the Futures market will be $(105.50 - 104.2) \times 100 = \text{Rs. } 130$

Interest Rate Futures (IRFs) (both perfectly and imperfectly hedged):

To reduce interest rate risk in a debt portfolio, scheme may hedge the portfolio or part of the portfolio (including one or more securities) on weighted average modified duration basis by using Interest Rate Futures (IRFs). The maximum extent of short position that may be taken in IRFs to hedge interest rate risk of the portfolio or part of the portfolio, is as per the formula given below:

$$\frac{(\text{Portfolio Modified Duration} \times \text{Market Value of the Portfolio})}{\text{Futures Modified Duration} \times \text{Futures price/ PAR}}$$

(Futures Modified Duration* Futures price/ PAR)

In case the IRF used for hedging the interest rate risk has different underlying security(s) than the existing position being hedged, it would result in imperfect hedging.

Imperfect hedging using IRFs may be considered to be exempted from the gross exposure, upto maximum of 20% of the net assets of the scheme, subject to the following:

- a. Exposure to IRFs is created only for hedging the interest rate risk based on the weighted average modified duration of the bond portfolio or part of the portfolio.
- b. The scheme is permitted to resort to imperfect hedging, without it being considered under the gross exposure limits, if and only if, the correlation between the portfolio or part of the portfolio (excluding the hedged portions, if any) and the IRF is atleast 0.9 at the time of initiation of hedge. In case of any subsequent deviation from the correlation criteria, the same may be rebalanced within 5 working days and if not rebalanced within the timeline, the derivative positions created for hedging shall be considered under the gross exposure computed in terms of Para 3 of SEBI circular dated August 18, 2010. The correlation should be calculated for a period of last 90 days.

Explanation: If the fund manager intends to do imperfect hedging upto 15% of the portfolio using IRFs on weighted average modified duration basis, either of the following conditions need to be complied with:

- i. The correlation for past 90 days between the portfolio and the IRF is at least 0.9 or
- ii. The correlation for past 90 days between the part of the portfolio (excluding the hedged portions, if any) i.e. at least 15% of the net asset of the scheme (including one or more securities) and the IRF is at least 0.9.

At no point of time, the net modified duration of part of the portfolio being hedged should be negative.

- c. The portion of imperfect hedging in excess of 20% of the net assets of the scheme should be considered as creating exposure and shall be included in the computation of gross exposure in terms of Para 3 of SEBI circular dated August 18, 2010.

The basic characteristics of the scheme will not be affected by hedging the portfolio or part of the portfolio (including one or more securities) based on the weighted average modified duration.

The interest rate hedging of the portfolio will be in the interest of the investors.

Hedging

Holders of the GOI securities are exposed to the risk of rising interest rates, which in turn results in the reduction in the value of their portfolio. So in order to protect against a fall in the value of their portfolio due to falling bond prices, they can take short position in IRF contracts.

Example:

On 17/05/2024 buy 7.26 G sec 2033: Rs. 100.19 at the current market price of Rs. 100.19

Step 1 - Short the 31/05/2024 IRF futures contract at say price of Rs. 100.29 (assuming IRF trading at premium)

Step 2 - Earn the carry (running yield) of the 10 yr G sec of 7.23% from date of purchase till IRF expiry.

Step 3 - IRF and cash market price will converge on the maturity of the contract hence sell the bond on the maturity.

Under the strategy, the trader has earned a return of

$$\text{Arbitrage} = (100.29 - 100.19) / 100.19 * 365 / 10 = 3.65\%$$

$$\text{Current yield of G sec} = 7.23\%$$

$$\text{Arbitrage} + \text{current yield of G sec} = 10.88\% \text{ (Holding period Arbitrage)}$$

(Note: For simplicity accrued interest is not considered for calculation)

Assuming IRF is trading at premium the above trade will be done.

Imperfect Hedge

Assume the portfolio of market value worth INR 1000 crore has a modified duration of 5. This is being hedged with an IRF that has a modified duration of 10. Considering that fund manager choose to hedge 20% of the portfolio the maximum extent of short position that may be taken in IRF is as below:

(Portfolio Modified Duration * Market Value of the Portfolio)

(Futures Modified Duration * Futures Price / PAR)
(5 * (0.2 * 1000))

$$= \frac{\text{-----}}{(10 * (101 / 100))}$$

= Rs. 99.01 Crores.

Hence the scheme can sell IRFs worth Rs. 99.01 Crores and with duration of 10 to hedge Rs. 200 Crores of portfolio with a duration of 5.

- b. This position limit shall be applicable on the combined position in all derivative contracts on an underlying stock at a Stock Exchange.
- c. For index based contracts, the Mutual Fund shall disclose the total open interest held by its scheme or all schemes put together in a particular underlying index, if such open interest equals to or exceeds 15% of the open interest of all derivative contracts on that underlying index.

As and when SEBI notifies amended limits in position limits for exchange traded derivative contracts in future, the aforesaid position limits, to the extent relevant, shall be read as if they were substituted with the SEBI amended limits.

As per para 12.25 of SEBI Master Circular dated June 27, 2024 “norms for investment and disclosure by Mutual Funds in derivatives”, the limits for exposure towards derivatives are as under:

1. The cumulative gross exposure through equity, debt, derivative positions, other permitted securities/assets and such other securities/assets as may be permitted by the Board from time to time should not exceed 100% of the net assets of the scheme.
2. Mutual Funds shall not write options or purchase instruments with embedded written options.

5. Exposure due to hedging positions may not be included in the above mentioned limits subject to the following:-

 - b. Hedging positions cannot be taken for existing derivative positions. Exposure due to such positions shall have to be added and treated under limits mentioned in Point 1.

c. Any derivative instrument used to hedge has the same underlying security as the existing position being hedged.

The quantity of underlying associated with the derivative position taken for hedging purposes does not exceed the quantity of the existing position against which hedge has been taken.

Mutual Funds may enter into plain vanilla interest rate swaps for hedging purposes.

The value of the notional principal in such cases must not exceed the value of respective existing assets being hedged by the scheme. The counter party in such transactions has to be an entity recognized as a market maker by RBI. Further, the value of the notional principal in such cases must not exceed the value of respective existing assets being hedged by the scheme. Exposure to a single counterparty in such transactions should not exceed 10% of the net assets of the scheme. However, if mutual funds are transacting in IRS through an electronic trading platform offered by the Clearing Corporation of India Ltd. (CCIL) and CCIL is the central counterparty for such transactions guaranteeing settlement, the single counterparty limit of 10% shall not be applicable.

Exposure due to derivative positions taken for hedging purposes in excess of the underlying position against which the hedging position has been taken, shall be treated under the limits mentioned in point 1.

Participation of Mutual Funds in Credit Default Swaps (CDS)

Mutual Fund Schemes as buyer of CDS

1. Schemes may buy CDS only for the purpose of hedging their credit risk on debt securities they hold in various schemes. The exposure of CDS shall not exceed respective debt security exposure, and such exposure may not be added to gross exposure of the scheme.

2. In case the protected debt security is sold, schemes shall ensure that the respective CDS position is closed within fifteen working days of selling the above protected debt security.

3. The exposure of any protected debt security, for determining single issuer, group, sectoral limits and credit risk for various purposes including Risk-o-meter and Potential Risk Class (PRC) matrix of MF schemes, shall be considered as exposure to either issuer of debt security (reference entity) or seller of CDS, whichever has higher credit rating (lowest long term rating of instruments of seller of CDS shall be considered for comparison).

The exposure shall form part of overall single issuer limits for the reference entity or seller of CDS, whichever is applicable. In case of same rating for reference entity and seller of CDS, the exposure shall then be considered on reference entity and not on seller of CDS.

4. MF schemes shall buy CDS only from such sellers that have instruments with lowest long-term rating of investment grade and above.

5. Schemes may buy CDS for investment grade and existing below investment grade debt securities in the portfolio, if any.

Mutual Fund Schemes as seller of CDS

1. MF Schemes may sell CDS only as part of investment in synthetic debt securities, i.e., sell CDS on a reference obligation covered with Cash/GSec/T-bills. Overnight and Liquid schemes shall not sell CDS contracts.

Provided, Schemes shall comply with the directions issued by RBI from time to time in this regard.

Schemes shall participate in CDS only through standard contracts prescribed by Fixed Income Money Market and Derivatives Association of India (FIMMDA).

All CDS contracts shall be transacted either through Central Counterparty, if any or Request For Quote (RFQ) Platform.

MFs shall ensure Two-way Credit Support Annex (CSA) as part of CDS contracts.

Exposure through CDS (Notional amount of both CDS bought and sold) shall not exceed 10% of AUM of scheme and shall be within the overall limit of derivatives exposure as prescribed in Scheme Information Documents.

Exposure in derivative positions shall be computed as follows:

Position	Exposure
Long Future	Futures Price * Lot Size * Number of Contracts
Short Future	Futures Price * Lot Size * Number of Contracts
Option bought	Option Premium Paid * Lot Size * Number of Contracts

2. Swing Pricing

SEBI introduced swing pricing framework for open ended debt mutual fund schemes (except overnight funds, Gilt funds and Gilt with 10-year maturity funds).

Swing pricing is applicable only for scenarios related to net outflows from the schemes. Further, the circular mandates full swing during market dislocation times for high-risk open-ended debt schemes. Pursuant to the SEBI Circular, the swing pricing framework will be adapted during market dislocation times.

Currently, the Fund has decided not to adopt a policy pertaining to swing pricing during normal times.

Swing pricing refers to a process of adjusting scheme's net asset value (NAV) to effectively pass on transaction costs stemming from net capital activity (i.e., flows into or out of the fund) to the investors associated with that activity during the life of a fund, excluding ramp-up period or termination. In a liquidity-challenged environment, quoted bid/ask spreads and overall trading cost can widen and may not be representative of the executed prices that can be achieved in the market.

Swing pricing can be a useful mechanism for protecting the interests of existing investors, specifically from the dilution of their holdings and the value of their capital.

Swing pricing mechanism is a tool which can help protect remaining investors during any of the below instances when:

- Any large investors choose to redeem where their actions would have material market impact costs
- More active trading takes place for the scheme or
- Scheme hold illiquid assets. Market Dislocation: SEBI will determine 'market dislocation' either based on AMFI's recommendation or suo-moto.

SEBI shall notify once market dislocation is declared that swing pricing will be applicable for a specified period. After the announcement of market dislocation, the swing pricing framework shall be mandated only for open ended debt schemes (except overnight funds, Gilt funds and Gilt with 10-year maturity funds) in terms of clause 2.6 of the SEBI Master Circular which:

- a. has High or Very High risk on the risk-o-meter in terms of clause 17.4 of the SEBI Master circular (as of the most recent period at the time of declaration of market dislocation) and
- b. classifies themselves in the cells A-III, B-II, B-III, C-I, C-II and C-III of Potential Risk Class (PRC) Matrix in terms of clause 17.5 of the SEBI Master Circular.

Swing threshold refers to a pre-determined threshold set in terms of percentage of AUM that trigger the adjustment in the NAV (swinging of the NAV). During the market dislocation times swing pricing will be adapted when the scheme has net outflow irrespective of any swing threshold.

Swing pricing shall be made applicable to all unitholders at PAN level for (redemptions and subscriptions) except for redemptions up to INR 2 lacs for each mutual fund scheme.

Minimum Swing Factor for Open-ended Debt Schemes			
Max Credit Risk of the Scheme →	Class A CRV** >=12)	Class B (CRV >=10)	Class C (CRV <10)
Max Interest Rate Risk of the Scheme			
Class I (MD ≤1)	Optional	Optional	1.5%
Class II (MD ≤=3)	Optional	1.25%	1.75%
Class III: Any MD	1%	1.5%	2%
*: Scheme may levy higher swing factor, based on pre-defined parameters, redemption pressure and current portfolio of the scheme subject to a cap on swing factor to be decided by AMC.			

Disclosures pertaining to NAV adjusted for swing factor

The Scheme performance shall be computed based on Scheme NAV before Swing adjustment i.e. the unswung NAV.

Disclosures pertaining to NAV adjusted for swing factor along with the performance impact shall be made by the AMCs in following format in SIDs and in scheme wise Annual Reports and Abridged summary and the same may be disclosed on the website.

Triggering Swing Pricing on re-opening of a scheme after announcement of winding-up

a) There may be instances where AMC, after making an announcement to wind up a scheme, decides to roll-back the decision to wind up the scheme. Such situations may trigger large scale redemptions and hence, it would be prudent to invoke the Swing Pricing mechanism to manage such a situation. In other words, if AMC decides to reverse its decision to wind up the scheme, it shall mandatorily invoke the Swing pricing upon re-opening a scheme for subscriptions and redemptions post such announcement.

b) The indicative range of swing pricing for the parameter of "Re-opening of the scheme after announcement of Winding-up" shall be the same as applicable for swing pricing during normal times as communicated by AMFI/SEBI from time to time, and shall be for higher of swing period as may be decided by the Board of AMC or for a minimum of 7 working days as per AMFI upon re-opening a scheme for subscriptions and redemptions).

Current Indicative Range of Swing Threshold: The current Indicative range of the amount of Swing factor based on the PRC matrix as prescribed by AMFI is as follows:

3. Segregation of Portfolio /Side pocketing:

To ensure fair treatment to all investors in case of a credit event and to deal with liquidity risk, SEBI has permitted creation of segregated portfolio of debt and money market instruments by mutual funds schemes

Creation of segregated portfolio shall be optional and at the discretion of the AMC. It should be created only if the Scheme information Document (SID) of the scheme has provisions for segregated portfolio with adequate disclosures. All new schemes should have the enabling provisions included in the SID for creation of segregated portfolio.

Segregated Portfolio

In the event of default, AMC is permitted to opt for creation of segregated portfolio as per the guidelines issued by SEBI.

- a. The term 'segregated portfolio' shall mean a portfolio, comprising of debt or money market instrument affected by a credit event (Default), that has been segregated in a mutual fund scheme(s).
- b. The term 'main portfolio' shall mean the scheme portfolio excluding the segregated portfolio.
- c. The term 'total portfolio' shall mean the scheme portfolio including the securities affected by the credit event.

Credit Event

AMC may create segregated portfolio in a mutual fund scheme subject to the following:

1. Segregated portfolio may be created, in case of a credit event at issuer level i.e., downgrade in credit rating by a SEBI registered Credit Rating Agency (CRA), as under:
 - Downgrade of a debt or money market instrument to 'below investment grade,' or
 - Subsequent downgrades of the said instruments from 'below investment grade', or
 - Similar such downgrades of a loan rating.
2. In case of difference in rating by multiple CRAs, the most conservative rating shall be considered. Creation of segregated portfolio shall be based on issuer level credit events as detailed above and implemented at the ISIN level.
3. Segregated portfolio of unrated debt or money market instruments may be created only in case of actual default of either the interest or principal amount. Actual default by the issuer of such instruments shall be considered as credit event for creation of segregated portfolio.
4. Unifi AMCs shall inform AMFI immediately about the actual default by the issuer. Upon being informed about the default, AMFI shall immediately inform the same to all AMCs. Pursuant to dissemination of information by AMFI about actual default by the issuer, AMCs may segregate the portfolio of debt or money market instruments of the said issuer.
5. Further, Asset Management Companies/Valuation Agencies shall ensure that the financial stress of the issuer and the capabilities of issuer to repay the dues/borrowings are reflected in the valuation of the securities from the trigger date onwards.

Process for Creation of Segregated Portfolio

1. Unifi AMC shall decide on creation of segregated portfolio on the day of credit event. In case it decides to segregate portfolio, it shall:
 - i. seek approval of trustees prior to creation of the segregated portfolio.
 - ii. immediately issue a press release disclosing its intention to segregate such debt and money market instrument and its impact on the investors. The mutual fund should also disclose that the segregation shall be subject to trustee approval. Additionally, the said press release shall be prominently disclosed on the website of the Unifi MF.
 - iii. ensure that till the time the trustee approval is received, which in no case shall exceed 1 business day from the day of credit event, the subscription and redemption in the scheme shall be suspended for processing with respect to creation of units and payment on redemptions.
2. Once trustee approval is received by the Unifi AMC:

- i. Segregated portfolio shall be effective from the day of credit event.
 - ii. Unifi AMC shall issue a press release immediately with all relevant information pertaining to the segregated portfolio. The said information shall also be submitted to SEBI.
 - iii. An e-mail or SMS should be sent to all unit holders of the concerned scheme(s).
 - iv. The NAV of both segregated and main portfolio shall be disclosed from the day of the credit event.
 - v. All existing investors in the scheme as on the day of the credit event shall be allotted equal number of units in the segregated portfolio as held in the main portfolio.
 - vi. No redemption and subscription shall be allowed in the segregated portfolio. However, in order to facilitate exit to unit holders in segregated portfolio, AMC shall enable listing of units of segregated portfolio on the recognized stock exchange within 10 working days of creation of segregated portfolio and also enable transfer of such units on receipt of transfer requests.
3. If the trustees do not approve the proposal to segregate portfolio, AMC shall issue a press release immediately informing investors of the same.

Valuation and processing of subscriptions and redemptions

Notwithstanding the decision to segregate the debt and money market instrument, the valuation should consider the credit event and the portfolio shall be valued based on the principles of fair valuation (i.e. realizable value of the assets) in terms of the relevant provisions of SEBI (Mutual Funds) Regulations, 1996 and Circular(s) issued thereunder.

All subscription and redemption requests for which NAV of the day of credit event or subsequent day is applicable will be processed as per the provisions on applicability of NAV as under:

- (a) Upon trustees' approval to create a segregated portfolio -
 - Investors redeeming their units will get redemption proceeds based on the NAV of main portfolio and will continue to hold the units of segregated portfolio.
 - Investors subscribing to the scheme will be allotted units only in the main portfolio based on its NAV.
- (b) In case trustees do not approve the proposal of segregated portfolio, subscription and redemption applications will be processed based on the NAV of total portfolio.
- (c) Debt schemes which have investment in instruments with special features viz. subordination to equity (absorbs losses before equity capital) and /or convertible to equity upon trigger of a pre-specified event for loss absorption (Additional Tier I bonds and Tier 2 bonds issued under Basel III) or debt schemes that have provision to invest in such instruments shall ensure that the said instrument is to be written off or converted to equity pursuant to any proposal, the date of said proposal may be treated as the trigger date. However, if the said instruments are written off or converted to equity without proposal, the date of write off or conversion of debt instrument to equity may be treated as the trigger date.

i. Disclosure Requirements

In order to enable the existing as well as the prospective investors to take informed decision, the following shall be adhered to:

1. A statement holding indicating the units held by the investors in the segregated portfolio along with the NAV of both segregated portfolio and main portfolio as on the day of the credit event shall be communicated to the investors within 5 working days of creation of the segregated portfolio.
2. Adequate disclosure of the segregated portfolio shall appear in all scheme related documents, in monthly and half-yearly portfolio disclosures and in the annual report of the mutual fund and the scheme.
3. The Net Asset Value (NAV) of the segregated portfolio shall be declared on every business day.
4. The information regarding number of segregated portfolios created in a scheme shall appear prominently under the name of the scheme at all relevant places such as SID, KIM-cum-Application Form, advertisement, Unifi MF and AMFI websites, etc.
5. The scheme performance required to be disclosed at various places shall include the impact of creation of segregated portfolio. The scheme performance should clearly reflect the fall in NAV to the extent of the portfolio segregated due to the credit event and the said fall in NAV along with recovery(ies), if any, shall be disclosed as a footnote to the scheme performance.
6. The disclosures at paragraphs (4) and (5) above regarding the segregated portfolio shall be carried out for a period of at least 3 years after the investments in segregated portfolio are fully recovered/ written-off.
7. The investors of the segregated portfolio shall be duly informed of the recovery proceedings of the investments of the segregated portfolio. Status update may be provided to the investors at the time of recovery and also at the time of writing-off of the segregated securities.
8. An illustration of disclosing the portfolios Pre-segregation and post segregation is provided as Annexure A.

TER for the Segregated Portfolio

1. AMC shall not charge investment and advisory fees on the segregated portfolio. However, TER (excluding the investment and advisory fees) can be charged, on a pro-rata basis only upon recovery of the investments in segregated portfolio.
2. The TER so levied shall not exceed the simple average of such expenses (excluding the investment and advisory fees) charged on daily basis on the main portfolio (in % terms) during the period for which the segregated portfolio was in existence.
3. The legal charges related to recovery of the investments of the segregated portfolio may be charged to the segregated portfolio in proportion to the amount of recovery. However, the same shall be within the maximum TER limit as applicable to the main portfolio. The legal charges in excess of the TER limits, if any, shall be borne by the Unifi AMC.
4. The costs related to segregated portfolio shall in no case be charged to the main portfolio.

ii. Monitoring by Trustees

1. In order to ensure timely recovery of investments of the segregated portfolio, trustees shall ensure that:

i. The AMC puts in sincere efforts to recover the investments of the segregated portfolio.

Any recovery of amount of the security in the segregated portfolio even after the write off shall be distributed to the investors of the segregated portfolio.

iii. An Action Taken Report (ATR) on the efforts made by the Unifi AMC to recover the investments of the segregated portfolio is placed in every trustee meeting till the investments are fully recovered/ written-off.

iv. The trustees shall monitor the compliance with the guidelines issued by SEBI regarding segregation of portfolio in mutual fund schemes and disclose in the half-yearly trustee reports filed with SEBI, the compliance in respect of every segregated portfolio created.

In order to avoid misuse of segregated portfolio, trustees shall ensure to have a mechanism in place to negatively impact the performance incentives of Fund Managers, Chief Investment Officers (CIOs), etc. involved in the investment process of securities under the segregated portfolio, mirroring the existing mechanism for performance incentives of the AMC, including claw back of such amount to the segregated portfolio of the scheme.

The existence of the provisions for segregated portfolio should not encourage the Fund managers to take undue credit risk in the scheme portfolio. Any misuse of the provisions of segregated portfolio, would be considered serious and stringent action may be initiated.

Risk Associated with Segregated Portfolio

(a) Investor

(b) of segregated portfolio may not be able to liquidate their holdings till the time recovery of money from the issuer.

(c) Security(ies) held in segregated portfolio may not realize any value.

(d) Listing of units of segregated portfolio in recognized stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further, trading price of units on the stock market may be significantly lower than the prevailing NAV.

AMCs shall inform AMFI immediately about the actual default by the issuer. Upon being informed about the default, AMFI shall immediately inform the same to all AMCs. Pursuant to dissemination of information by AMFI about actual default by the issuer, AMCs may segregate the portfolio of debt or money market instruments of the said issuer.

Further, Asset Management Companies/Valuation Agencies shall ensure that the financial stress of the issuer and the capabilities of issuer to repay the dues/borrowings are reflected in the valuation of the securities from the trigger date onwards.

4. Short Selling/Stock Lending:

Subject to the Regulations and Para 12.11 of Master Circular dated June 27, 2024 and the applicable guidelines issued by SEBI, the Mutual Fund may engage in short selling/ stock lending. Stock lending means the lending of stock to another person or entity for a fixed period of time, at a negotiated compensation. The securities lent will be returned by the borrower on expiry of the stipulated period.

The Investment Manager will apply the limits as specified in SID of the respective scheme, should it desire to engage in Stock Lending.

5. Borrowing by Mutual Fund

The Mutual Fund is allowed to borrow to meet the temporary liquidity needs of the schemes for the purpose of repurchase, redemption of units or payment of interest or Income Distribution cum Capital Withdrawal to the unit holders, provided that the Mutual Fund shall not borrow more than 20% of the net assets of each scheme and the duration of such borrowing shall not exceed a period of six months. The cost of borrowing shall be adjusted against the portfolio yield of the scheme borrowing and borrowing cost over and above the portfolio yield shall be absorbed by the AMC.

E. Transaction Charges and Stamp Duty

(a) Transaction charges

Investors may note that Unifi AMC has decided not to pay transaction charges to the distributors. Accordingly, no transaction charges shall be deducted from the investment amount given by the investor, for transactions / applications received through the distributors (i.e. in Regular Plan) and full investment amount will be invested in the Scheme.

(b) Stamp Duty

Unitholders are requested to note that, pursuant to Notification No. S.O. 1226(E) and G.S.R. 226(E) dated March 30, 2020 issued by Department of Revenue, Ministry of Finance, Government of India, read with Part I of Chapter IV of the Finance Act, 2019 dated February 21, 2019 issued by Legislative Department, Ministry of Law and Justice, Government of India, a stamp duty @0.005% of the transaction value would be levied on applicable mutual fund transactions (including transactions carried through stock exchanges and depositories for units in demat mode), with effect from July 1, 2020. Accordingly, pursuant to levy of stamp duty, the number of units allotted on purchase/switch in transactions

(including IDCW reinvestment) to the unitholders would be reduced to that extent.

F. Requirement of minimum number of investors in a scheme

Applicability for an open-ended scheme

1. The Scheme/Plan shall have:

- a. a minimum of 20 investors and
- b. no single investor shall account for more than 25% of the corpus of the Scheme/Plan(s).

2 If either/both of such limit(s) is breached during the NFO of the Scheme, it shall be ensured that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions.

3 In case the Scheme / Plan(s) does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation would become applicable automatically without any reference from SEBI and accordingly the Scheme / Plan(s) shall be wound up and the units would be redeemed at applicable NAV.

4 The average net assets of the scheme would be calculated daily and any breach of the 25 % holding limit by an investor would be determined. At the end of the quarter, the average of daily holding by each such investor is computed to determine whether that investor has breached the 25 % limit over the quarter. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days' notice to redeem his exposure over the 25 % limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period.

5 The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI.

6 The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.
